2022 ANNUAL REPORT

Taiwan Stock Exchange Market Observation Post System: http://mops.twse.com.tw
ESON annual report is available at http://www.eson.com.cn
Printed on April 22, 2023

I . Headquarters And Branch

1. Headquarters: Eson Precision Ind. Co., Ltd.

Address: P.O. Box 31119 Grand Pavilion, Hibiscus Way, 802 West Bay Road, Grand Cayman, KY1-1205 Cayman Islands

Tel: (886)2-2267-3272

2.Branch: Eson Precision Ind. Co., Ltd. Taiwan Branch

Address: 12F.-3, No.2, Sec. 4, Zhongyang Rd., Tucheng Dist., New Taipei City 236, Taiwan Tel: (886)2-2267-3272

3. Branches in China & Hong Kong

(1) Kunshan Eson Precision Engineering Co., Ltd.

Address: No. 88, Yuanfeng Road, Yushan Town, Kunshan City, Jiangsu Province, China

Tel: (86)512-5757-2938

(2) Yantai Zheng Yi Precision Electronics Co., Ltd.

Address: No. 88, Tianjin South Road, Economy and Technology Development Area A-7, Yantai, Shandong Province, China

Tel: (86)535-2168-888

(3) Wuxi Xinguan Metal Science & Technology Co., Ltd.

Address: North of Furong 4th Road, Xishan Economic Development Zone, Wuxi City, Jiangsu Province, China

Tel: (86)510-8380-9000

(4) Dongguan Yihong Precision Mould Co., Ltd.

Address: No.6, Xin Yuan Sounth Road, Ke Yuan Cheng, Tangxia Town, Dongguan City, Guangdong Province, China

Tel: (86)769-8791-9391

(5) Kunshan Kang Rui Package Material Co., Ltd.

Address: No. 88, Yuanfeng Road, Yushan Town, Kunshan City, Jiangsu Province, China

Tel: (86)512-5757-2938

(6) Heng Xie Enterprises Limited

Address: Suites 2205-6 Island Place Tower, 510 King's Rd, North Point, Hong Kong.

Tel: (886)2-2267-3272

(7) Kong Eagle International Limited.

Address: Suites 2205-6 Island Place Tower, 510 King's Rd, North Point, Hong Kong.

Tel: (886)2-2267-3272

- 4. Branches in Singapore
 - (1) Multiwin Precision Ind Pte. Ltd

Address: 54 Genting Lane #03-05 Ruby Land Complex Singapore

Tel: (886)2-2267-3272

(2) Eson Precision Industry (Singapore) Pte. Ltd.

Address: 54 Genting Lane #03-05 Ruby Land Complex Singapore

Tel: (886)2-2267-3272

- 5.Branches in Mexico
 - (1) Multiwin De Mexico S.A. De C.V.

Address: Blvd La Jolla 4432, Parque Industrial La Jolla, Cp 2252 Tijuana, Bc Mexico

Tel: (52)664-250-6721

(2) Esonmex Monterrey S.A. De C.V.

Address: 5304 Del Paseo Residecial Monterrey 64920

Tel: (52)664-250-6721

- 6.Branches in Slovakia
 - (1) Eson Europe S.R.O.

Address: Rontgenova 26 851 02 Bratislava Slovakia

Tel: (886)2-2267-3272

(2) Eson Slovakia A.S.

Address: Rontgenova 26 851 01 Bratislava Slovakia

Tel: (886)2-2267-3272

7.Branches in Mauritius

(1) Global Sun Trading Co., Ltd.

Address: P.O. Box 80, Felix House, 24 Dr. Joseph Riviere street, Port Louis, Mauritius

Tel: (886)2-2267-3272

(2) Grand Liberty Co., Ltd..

Address: Suite 802, St James Court St Denis Street, Port Louis, Mauritius

Tel: (886)2-2267-3272

(3) Ample Wealth Enterprise Ltd.

Address: Suite 802, St James Court St Denis Street, Port Louis, Mauritius

Tel: (886)2-2267-3272

(4) Zeal International Co., Ltd.

Address: Suite 802, St James Court St Denis Street, Port Louis, Mauritius

Tel: (886)2-2267-3272

(5) Unique Champion Co., Ltd.

Address: Level 3, Alexander House, 35 Cybercity, Ebene, Mauritius

Tel: (886)2-2267-3272

(6) Zenith Profits Co., Ltd.

Address: Suite 802, St James Court St Denis Street, Port Louis, Mauritius

Tel: (886)2-2267-3272

8.Branches in Samoa

(a) All Spacer Enterprises Co., Ltd.

Address: Offshore Chambers, P.O. Box 217, Apia, Samoa

Tel: (886)2-2267-3272

9.Branches in Malaysia

(1) Eson Precision Engineering (Malaysia) Sdn. Bhd.

Address: Lot 3, Jalan P/10, Kawasan Perusahaan Seksyen 10, 43650 Bandar Baru Bangi Selangor, Malaysia.

•

Tel: (60)3-8920-0270

(2) Eson Batupahat Precision Engineering Sdn. Bhd.

Address: Plo-2, Kawasan Perindustrian Sri Gading, 83009 Batupahat Johor, Malaysia.

Tel: (60)7-455-8266

10.Branches in Vietnam

(1) Eson (VN) Precision Industry Co., Ltd.

Address: Lot Cn-05 Dong Mai Industrial Park, Dong Mai Ward, Quang Yen Town, Quang Ninh

Province, Vietnam

Tel: (886)2-2267-3272

11.Branches in America

(1) Blackyotta Inc

Address: 2555 Camino del Rio S, Suite 101, San Diego, CA 92108

1 Letter to Shareholders

I. 2022 Business Report

1. Business Plan Implementation Results

The 2022 consolidated turnover of the Company amounted to NT\$14.0 billion, or a 16.5% growth from the previous year. Three major product lines of the Company, namely automobile parts, cloud products, and consumer electronics, have exhibited growth trends. Of which, automobile parts have exhibited the most significant growth. Altogether, the net profit after tax attributable to the equity holders of the Company for the entire year amounted to NT\$801 million. In the future, the Company will continue to focus on expanding the niche product mix strategy, continuous refinement of production processes, and effective control of business costs.

I would like to express my deepest respect on behalf of ESON's management team. We are truly grateful for the continued support and encouragement of all our shareholders. This support has enabled our management team to work harder to create value for our stakeholders and march together toward a better future.

2. Financial Status and Profitability:

EPS (NT\$)	4.75	2.75

II. Technology development:

- (I) Product innovation: Existing manufacturing technologies and the advantages conferred by our global sites are being actively leveraged to strengthen our service capabilities and co-develop new products in communications, consumer products, data centers, and new energy vehicles with our clients.
- (II) Greater production automation and application of big data: Smart product automation and quality inspection is being progressively rolled out in response to economic transformation, the accelerating pace of increases in labor costs, as well as environmental and safety requirements. More automation is now being introduced and accumulated production data used to prevent production anomalies, improve quality, ensure production safety, and boost productivity. In this way, the goals of reducing labor costs, ensuring employee safety during production and increasing productivity can be achieved while still realizing growth of both profits and revenues.
- (III) Integration and development key processes: The Company set out to obtain high value-added production technologies and integration capabilities to provide clients with a variety of options. Options such as precision molds and welding skills serve to enhance the long-term competitiveness of the Company.
- (IV) In-mold injection molding machine: Different materials are combined into a single component through molding processes. Automation was also developed to increase productivity and production precision in order to realize the goals of product weight and cost reduction.
- (V) Low-pressure injection molding technology: This molding technology for external automotive trim is used for molding plastic leather, improve the efficiency of compression molding processes, and reduce manpower/production costs. We expanded the scope of application for molding techniques to meet the diverse product requirements of clients.
- (VI) Development of laminated bus bar manufacturing process: Implementation of laminated busbar in the manufacturing process combines processes such as high-speed stamping, high-polymer diffusion welding, CNC automated processing, and non-homogeneous material welding to offer customers with diversified laminated bus bar products. This further expands the new energy vehicle market and will generate new opportunities for profit.

III. Future Outlook

The Company has won the trust and support of many important clients in a fast-changing industry through our outstanding capabilities in product design, manufacturing capabilities in each region, and the competitive advantages offered by vertical integration in a fast-changing industry. The company's product mix strategy currently focuses on automobiles, cloud technology, communications and consumer electronics. Furthermore, in the interest of sustainable development and long-term sales growth, the Company will continue building long-term relationships with our clients and tailor our product development and planning to market requirements. The 2022 product strategy called for the following:

(I) Consumer products: With a growing demand for large-screen TVs, the Company will draw upon its outstanding production technology and advanced equipment to consolidate production at overseas sites. Strengthening production capacity for high-end TV components will establish long-term value and a solid core for our competitiveness so that we can meet client expectations and generate more revenue.

- (II) E lectric vehicle products: The Company has accumulated many years of experience in the electric vehicle (EV) industry. Strong growth in new energy vehicles means that the development of related clients and expanded supply of components, as well as plans to transition to an assembly supplier, will help boost revenue growth and profits generated by the EV sector.
- (III) Server products: The mass adoption of cloud, metaverse, and data centers is benefiting from the high-speed development of wireless communications. The demand for servers and cabinets will continue to grow. The Company will expand and consolidate our domestic and overseas resources so that we can meet the requirements for market growth and boost our production capacity.
- (IV) Communication products: Future requirements on high-speed communications for smart vehicles mean that bandwidth and transmission latency will all become increasingly important over the next few years. The Company is actively investing in new product partnerships and will use the clients' speed to improve production capacity, logistics and management, and strengthen the overall quality of service.

IV. Effects of the competitive environment, the regulatory environment, and the macroeconomic environment

- (I) C ompetition remains heated for consumer products. The Company will continuously expand production and logistics capacity, decrease the risks and costs of regional production, enhance production capacity coordination between factories, and maintain the development of high value-added products to increase competitiveness and profitability.
- (II) As the economic cycle remains fluid, the tide of rising interest rates globally and chaotic monetary policies in various countries has resulted in a constant increase in the cost of funds. The Company shall be more prudent with the financial and capital management, while increasing liquidity to address future changes.
- (III) The Company will comply with the relevant regulations of various countries and client demands by gradually implementing practices related to environmental protection (Environment), social responsibility (Social), and corporate governance (Governance). Actions such as energy conservation and carbon reduction, upholding corporate social responsibility, and improving work environments will demonstrate the Company's values in sustainable operations.

Finally, we would like to express our most sincere gratitude to you, our shareholders, investors, and employees, for your continued support. Join us as we advance steadily forward and enjoy the fruits of our success. We look forward to your feedback. We wish you

health and prosperity

Chairman: Tsai, Chia-Hsiang President: Tsai, Chia-Hsiang Accounting Manager: Lin, You Ching

2 Company Profile

2.1 Introduction of the Company

2.1.1 Establishment Date and Introduction of the Company

Eson Precision Ind. Co., Ltd. (hereinafter referred to as the Company or Eson Precision) is a company established by the two shareholders Global Sun Trading Co., Ltd. and All Spacer Enterprises Co., Ltd. in the Cayman Islands on June 17, 2008. The original name was Multiwin Precision Ind. Co., Ltd. The Company was renamed to Eson Precision in February 2012.

After the establishment, the Company exchanged all the shares of the two shareholders with new shares from an increase in capital to improve the investment structure and integrate resources, and subsequently reinvest according to business development needs. Up until now, there are 24 subsidiaries and 1 branch company, mainly engaged in the design, research and development, production and sales of molds, plastics, hardware products, new electronic components and flat panel displays.

3.3.5 Fulfillment of CSR and Deviations from the "Corporate Social Responsibility Best Practice Principles for TWSE/GTSM Listed Companies

			Implementation Status	Deviations from "the Corporate Social
Evaluation Item	Yes	No	Abstract Explanation	Responsibility Best-Practice Principles for TWSE/TPEx Listed Companies" and Reasons
1.Does the Company establish a governance structure to promote sustainable development, established a dedicated (part-time) unit to promote sustainable development; and did the Board of Directors authorize senior management to handle it and report the supervisory status to the Board of Directors? (implementation, not compliance or interpretation)		✓	 The Company's implementation of matters related to sustainable development are coordinated by the Office of the President and executed by various departments. Comply with the operating concept of Plan, Do, Check, and Acting (P-D-C-A) to regularly assess response measures for sustainable development. Each quarter, executives propose strategic advancements to the board, who then evaluate the viability of successful strategies and review strategic development. In compliance with the Financial Supervisory Commission's Sustainable Development Roadmap, the Company reported all items and schedules for conducting inventory of greenhouse gas emissions to the board on June 24, 2022; a report was submitted to the board to establish organizational structure to implement carbon inventory on November 8. Chairman Cai Jia Xiang was appointed management representative and Chief Financial Officer Lin You Qing was appointed as chair responsible for the supervision, resource planning, and support coordination of conducting an inventory of greenhouse gases. 	The company will implement such policy in accordance with applicable laws in the future.
2.Does the company assess ESG risks associated with its operations based on the principle of materiality, and establish related risk management policies or strategies? (implementation, not compliance or interpretation)		✓	1. The Company conducts risk assessments for important issues based on the principle of materiality. Risk management policies or strategies are established according to evaluated risks as shown in	policy in accordance with applicable laws in the future.

(4) Does the company take inventory of its greenhouse gas emissions, water consumption, and total weight of waste in the last two years, and implement policies on energy efficiency and carbon dioxide reduction, greenhouse gas reduction, water reduction, or waste management?		✓	solution due to its many advantages of pollution-free, sustainable, high volume, wide distribution, and variety of utilization forms. The key to maintaining long-term competitiveness is accelerating the implementation of green factories and constructing green manufacturing systems. On September 13, 2022, the Company signed a 25-year partnership agreement with Mingyi New Energy Technology Co., Ltd. to calculate the carbon reduction benefits of power generation by referencing existing use of coal-fired power generation: Utilizing the calculation standard of 328g consumption per kWh of electricity, 997g of standard coal emissions, 30g of carbon dioxide, 15g of sulfur dioxide, and 1.3 liters clean water consumed by nitrogen oxides, the project's first year of operation will achieve the following effects in carbon reduction: Power generation of 5.501 million kWh, replace 1804 tons of standard coal, reduce carbon dioxide emissions by 5,484 tons, reduce sulfur dioxide emissions by 165 tons, reduce nitrogen oxide emissions by 82 tons, and conserve 7,1512 tons of clean water. At 25 years, the project will achieve the following effects in carbon reduction: Power generation of 124.323 million kWh, replace 40,777 tons of standard coal, reduce carbon dioxide emissions by 123,950 tons, reduce sulfur dioxide emissions by 3,729 tons, reduce nitrogen oxide emissions by 1,864 tons, and conserve 161,619 tons of clean water. The Company has obtained certification in ISO14001 environmental management system and implements various energy conservation plans that manages the usage statistics of resources. Energy conservation and recycling are comprehensively practiced to reduce resource waste; in 2023, the Company began taking inventory of greenhouse gas emissions. 1. Energy conservation plan for lighting: The Company's Taiwan branch will gradually implement energy conserving light sources and install two-way valves along with temperature controls in air conditioning to achieve energy conservation. 2. Water conservation plan: In 20	The company will implement such policy in accordance with applicable
			tons of water, a 15.2% reduction compared to 85,376 tons consumed in 2021.

None

3.3.9 Internal Control Systems

1. Declaration of Internal Control

^{6.}Other important information to facilitate a better understanding of the company's ethical corporate management policies (e.g., review and amend its policies).

The company signs a "vendor commitment letter" with the supplier, stating that the supplier should ensure that business activities are carried out in a transparent and fair manner. Transactions with clients shall be carried out with honesty. Notes shall be added to the trading contract as appropriate to show the company's determination to operate with integrity.

Eson Precision Ind. Co., Ltd. Internal Control System Statement

Date: 3/13/2023

The Company states the following with regard to its internal control system during fiscal year 2022, based on the findings

of self-assessment:

1. The Company is fully aware that establishing, operating, and maintain an internal control system are the responsibility of its Board of Directors and management. The Company has established such a system aimed at providing reasonable

assurance of the achievement of objectives in the effectiveness and efficiency of operations (including profits,

performance, and safeguard of asset security), the reliability, timeliness, transparency, and regulatory compliance of

reporting, and compliance with applicable laws, regulations, and bylaws.

2. An internal control system has inherent limitations. No matter how perfectly designed, and effective internal control

system can provide only reasonable assurance of accomplishing the three goals mentioned above. Furthermore, the

effectiveness of an internal control system may change along with changes in environment or circumstances. However,

the internal control system of the Company contains self-monitoring mechanisms, the Company takes corrective actions

as soon as a deficiency is identified.

3. The Company judges the design and operating effectiveness of its internal control system based on the criteria provided

in the Regulations Governing the Establishment of Internal Control Systems by Public Companies (herein below, the

"Regulations"). The internal control system judgment criteria adopted by the Regulations divide internal control into

five elements based on the process of management control: 1.control environment 2.risk assessment 3.control activities

4.information and communications 5.monitoring activities. Each element further contains several items. Please refer to

the Regulations for details.

4. The Company has evaluated the design and operating effectiveness of its internal control system according to the

aforesaid criteria.

5. Based on the findings of the assessment mentioned in the preceding paragraph, the Company believes that as of

12/31/2022 its internal control system (including its supervision and management of subsidiaries), encompassing

internal controls for knowledge of the degree of achievement of operational effectiveness and efficiency objectives, the

reliability, timeliness, transparency, and regulatory compliance of the reporting, and compliance with applicable laws,

regulations, and bylaws, is effectively designed and operating, and reasonably assures the achievement of the above-

stated objectives.

6. This Statement will become a major part of the content of the Company's Annual Report and Prospectus, and will be

made public. Any falsehood, concealment, or other illegality in the content made public will entail legal liability under

Articles 20, 32, 171, and 174 of the Securities and Exchange Act.

7. This Statement has been passed by the Board of Directors Meeting of the Company held on 3/13/2023, where 0 of the

7 attending directors expressed dissenting opinions, and the remainder all affirmed the content of this Statement.

Eson Precision Ind. Co., Ltd.

Price / Dividend Ratio = Average Market Price / Cash Dividends per Share
Cash Dividend Yield Rate = Cash Dividends per Share / Average Market Price

4.1.6 The company's dividend policies and execution

1. Dividend Policy stipulated in the Company's Articles of Incorporation

The Board may, subject to approval by the Members by way of Ordinary Resolution or, in the case of Article 11.4(a), Supermajority Resolution and subject to these Articles and any direction of the Company in general meeting, declare a Dividend to be paid to the Members in proportion to the number of shares held by them, and such Dividend may be paid in cash, shares or, subject to Article 13.2, wholly or partly in specie. No unpaid Dividend shall bear interest as against the Company.

Subject to the Law, Article 11.4(a) and this Article and except as otherwise provided by the rights attached to any shares, the Company may distribute profits in accordance with a proposal for profits distribution approved by the Board and sanctioned by the Members by an Ordinary Resolution, in general meetings. No Dividends or other distribution shall be paid except out of profits of the Company, realization or un realization, out of share premium account or any reserve, fund or account as otherwise permitted by the Law. Except as otherwise provided by the rights attached to any shares, all Dividends and other distributions shall be paid according to the number of the shares that a Member holds. If any share is issued on terms providing that it shall rank for Dividend as from a particular date, that share shall rank for Dividends accordingly.

Upon the final settlement of the Company's accounts, if there is "surplus profit" (as defined below), the Company shall set aside two per cent (2%) to eight per cent (8%) as compensation to employees ("**Employees' Compensation**") and Employees' Compensation may be distributed to employees of the Company and its Subsidiaries, who meet certain qualifications. The Company shall, from the surplus profit, set aside no more than zero point five per cent (0.5%) thereof as remuneration for the Directors ("**Directors' Remuneration**"). The distribution proposals in respect of Employees' Compensation and Directors' Remuneration shall be approved by a majority of the Directors at a meeting attended by two-thirds or more of the total number of the Directors and submitted to the shareholders' meeting for report. However, if the Company has accumulated losses, the Company shall reserve an amount thereof for making up the losses before proceeding with the abovementioned distributions and allocation. The "surplus profit" referred to above means the net profit before tax and for the avoidance of doubt, such amount is before any payment of compensation to employees and remuneration for the Directors and is exclusive of the earnings accumulated from previous years.

In determining the Company's dividend policy, the Board recognizes that the Company operates in a mature industry, and has stable profit streams and a sound financial structure. In determining the amount, if any, of the Dividend or other distribution it recommends to Members for approval in any financial year, the Board:

- (a) may take into consideration the earnings of the Company, overall development, financial planning, capital needs, industry outlook and future prospects of the Company in the relevant financial year, so as to ensure the protection of Members' rights and interests; and
- (b) shall set aside out of the profits of the Company for each financial year: (i) a reserve for payment of tax for the relevant financial year; (ii) an amount to offset losses incurred in previous years; (iii) ten per cent (10%) as a general reserve ("Statutory Reserve") (unless the

Statutory Reserve has reached the total paid-up capital of the Company), and (iv) a special surplus reserve as required by the applicable securities authority under the Applicable Public Company Rules or a reserve as determined by the Board pursuant to Article 14.1.

Subject to compliance with the Law and after setting aside the amounts for Employees' Compensation and Directors' Remuneration in accordance with Article 13.4 and such amounts as the Board deems fit in accordance with the distribution policy set out in Article 13.5, the Board shall recommend to Members for approval to distribute no less than ten per cent (10%) of the earnings generated from the immediately preceding financial year (exclusive of those accumulated from previous years) out of the distributable amount as Dividend to the Members and the allocation will be made upon the passing of the resolution by the Members.

Dividends to the Members and the Employees' Compensation may be distributed, in the discretion of the Board, by way of cash or by way of applying such sum in paying up in full unissued shares or a combination of both for allocation and distribution to employees or the Members, provided that, in the case of a distribution to Members, no less than fifty per cent (50%) of the total amount of such Dividend shall be paid in cash. No unpaid Dividend and compensation shall bear interest as against the Company.

2. Proposed Dividend Distribution:

The Board approved the proposal NTD\$1.6 of per share for 2022 dividend distribution at its meeting on March 13, 2023. The proposal will become effective according to the relevant regulations, upon the approval of shareholders at the Annual General Shareholders' Meeting.

		Unit: NTD \$
Beginning retained earnings		1,323,552,720
Add: net profit after tax	800,915,427	
Less: 10% legal reserve	(80,091,543)	
Distributable net profit	720,823,884	720,823,884
Distributable items:		
Dividend to shareholders (NTD\$1.4of per share)		(269,646,264)
Unappropriated retained earnings		1,774,730,340

^{1.} The cash dividend distribution will be calculated to the nearest NT dollar, the cash dividend distribution with NT dollar.

3. Anticipation of significant changes in the dividend policy:

None

4.1.7 The impact of the stock dividend resolved in the current shareholders' meeting on the Company's business performance and earnings per share Not applicable.

^{2.} According to convert the functional currency into NT dollar.

4.1.8 Remuneration to employees and directors

1. Remuneration to employees and directors stipulated in the Company's Articles of Incorporation.

Upon the final settlement of the Company's accounts, if there is "surplus profit" (as defined below), the Company shall set aside two per cent (2%) to eight per cent (8%) as compensation to employees ("Employees' Compensation") and Employees' Compensation may be distributed to employees of the Company and its Subsidiaries, who meet certain qualifications. The Company shall, from the surplus profit, set aside no more than zero point five per cent (0.5%) thereof as remuneration for the Directors ("Directors' Remuneration"). The distribution proposals in respect of Employees' Compensation and Directors' Remuneration shall be approved by a majority of the Directors at a meeting attended by two-thirds or more of the total number of the Directors and submitted to the shareholders' meeting for report. However, if the Company has accumulated losses, the Company shall reserve an amount thereof for making up the losses before proceeding with the abovementioned distributions and allocation. The "surplus profit" referred to above means the net profit before tax and for the avoidance of doubt, such amount is before any payment of compensation to employees and remuneration for the Directors and is exclusive of the earnings accumulated from previous years.

2.Accounting treatment applied to the difference between actual and estimated remuneration to employees and directors.

Shall there be any difference between the actual amount of remuneration approved by Annual Shareholders' Meeting and that of the estimation, it will be deemed as the changes in accounting estimated and will be recognized in the profit and loss account of the distributing year.

- 3. Distribution of remuneration to employees resolved by the Board of Directors:
 - (1) The Company distributes employees' compensation in the amount of NT\$45,868,241 and distributes directors' remuneration in the amount of NT\$5,733,526. The distribution will take place in cash.
 - (2) Regarding allocation of staff cash compensation, stock remuneration and directors' compensation, in case of any discrepancy between the amounts and the amortized estimates for the year, the differences, reasons, and responses should be disclosed: Earnings undistributed due to reasons such as considerations of allotting 10% of the general reserve by the end of the current period shall fall within a specific percentage range according to the Company's Articles of Incorporation. When the actual allotment and the estimate differ after resolution of the Shareholders' meeting, the accountant's estimated change shall be adopted and implemented in the books following resolution on the annual adjustment at the Shareholders' meeting.
 - (3) The ratio of the proposed distribution of stock shares as remuneration to employees to the total net income and remuneration to employees on the individual financial statements: not applicable.
 - (4) The imputed earnings per share after distributing the remuneration to employees, directors, and supervisors is to be proposed for distribution.

Not applicable due to employee renumeration, directors and supervisors compensation being recognized as expenses.

4. The actual distribution of remuneration to employees, directors and supervisors in previous year

The Company's Board of Director resolved 2021 director and employee remuneration and reported shareholders' meeting on June 24, 2022. The directors' compensation amount is as follows:

Item	Amount (NT\$)
Remuneration to employees	25,160,816
Remuneration to directors	3,145,112

The aforementioned director and employee remuneration amount had been recognized as expenses in 2021. The amount listed in the books is consistent with the allotted amounts resolved in the Shareholders' meeting.

5 Overview of Business Operation

5.1 Content of business

5.1.1 Business scope

The main contents of the business service
 The company is mainly engaged in the design, development, manufacturing and sales of various consumer electronic components and molds.

2. Business ratio of main products

Unit: NT\$ thousands

Main mus du sta	Main and ducts 2021		2022	
Main products	Amount	%	Amount	%
TV	5,092,982	42.29%	3,715,667	26.48%
Mechanical Parts				
Automobile parts	4,033,012	33.49%	6,230,656	44.41%
Server	2,139,873	17.77%	3,301,905	23.53%
Molds and Other	776,578	6.45%	783,308	5.58%
Total	12,042,445	100.00%	14,031,536	100.00%

- 3. The Company's current products (service)
 - A. Mold design and production sales

Starting with precision molds, we have accumulated many years of professional technology to satisfy various customers' mold requirements, and to produce them for self-use and external sales.

- B. Design and manufacturing of various consumer electronic components

 According to customer needs, we specialize in the production of various sizes of TV, NB,

 PC, Server, telecommunication, game console, home appliance and other components.
- C. Product appearance processing

Surface treatment of mechanical part materials such as metal/plastic surface spray coating, electrocoating, anodizing, laser engraving, evaporation and heat/water transfer printing and other processes.

- 4. New products (service) planned for development
 - A. TV products: The popularization of 8K TVs, MiniLED, artificial intelligence, and IoT technology as well as the annual price decrease of large TVs will be the key factors that impact development of the TV industry in 2023. Due to stimulation from new technologies, price decreases, and the launch of 8K gaming machines, demand for TV replacements have gradually spread in the market; it's estimated that the TV product market will exhibit slight growth in 2023 compared to 2022. ESON's outstanding mold technology and advanced equipment can satisfy production capacity and generate excellent revenue.
 - B. Application of new energy car products: Sales of electric vehicles increased drastically from 2020-2022. The trend of replacing traditional gas vehicles with electric vehicles is gradually

becoming clear. Additionally, since 2020, countries have actively promoted infrastructure, such as charging stations on highways, parking spots with charging equipment, and more for electric vehicles. This has further expanded the market scale of new energy vehicles. For nearly a decade, ESON's dedication to the new energy vehicle process chain has resulted in the accumulation of in-depth experience in car part development, allowing the Company to transition into an assembly supplier in 2020. In the future, ESON will focus on the planning and product development of parts related to charging piles; additionally, the Company will actively strategize to become an assembly supplier for new energy vehicles.

- C. Communication products: Low orbit satellite communications provides high performance internet services at low cost to users in remote areas who are not covered by global optical cable and base station networks. As a result, the number of Starlink users has exceeded 1 million in 2022 and continues to grow by 20% annually. The future vision of internet availability everywhere is becoming reality. As such, IoT applications are becoming more widespread. According to "The mobile economy 2022" report published by GSMA, the number of global IoT connections will reach 23.3 billion in 2025. ESON's development experience in cars and consumer electronics offers exceptional mold technology and advanced equipment that can satisfy production capacity and generate outstanding revenue for netcom equipment, especially in the aspect of low orbit satellite communications.
- D. Server products: The application and evolution of new technologies such as artificial intelligence (AI), virtual reality (VR), augmented reality (AR), and 5G have driven sustained growth in servers. The server industry has exhibited increased growth in recent years and it's estimated that the trend will continue in 2023. The primary growth driver of servers will be demand from cloud service providers, impacting changes to the back-end supply chain. The low growth of servers will become a key point of focus in supply chains; competition will be inevitable in the areas of core processors to the design and manufacturing of servers. ESON will leverage advantages in overseas production equipment and regional location to initiate collaboration opportunities with local communications device suppliers.

5.1.2 Industry overview

1. Industrial status and development

In recent years, electronic products have opened a new generation of principles. The electronic and communications industry is becoming more diverse, tech-focused and all new end-consumer layers are continually being generated. For instance, smartphone upgrades, VR/AR, smart homes, wearable devices, automotive electronics, and 5G communications as well as new computer system architectures such as big data, cloud computing, IoT, and artificial intelligence will comprehensively overturn the industry structure of traditional communications.

The Company is addressing industry changes and activity by actively developing peripheral products; meanwhile, the personalization and trend culture of 3C electronic products has caused product aesthetics to become a primary factor that determines consumer purchases.

As such, new business opportunities have been developed based on the existing variety of products. The internal/external components produced by the Company, excluding low cost plastic parts used in the external of mid to low price products, feature better rigidity and cooling and can be applied as lightweight, premium metallic materials; this has recently become an area the Company is actively

researching and developing.

For many years, developments in the electronic industry have been applied to end products primarily in those from the LCD TV industry, car industry, and servers. As changes occur in end product industries, this shall directly impact the Company's business development:

A. LCD TVs

The global economy's slow recovery in 2022 and significant inflation caused by the Russia-Ukraine War has decreased real purchasing power. The TV market's macro environment has deteriorated and despite the Qatar World Cup, which drove a surge in TV consumption, it has been unable to stem the decrease in global TV shipments. The "2022 Monthly Report of Global TV Shipment Volume of TV Brands" published by AVC Revo indicates that the 2022 global TV shipments of 202.5M was a YOY decrease of 5.6%; the shipment area of 144.6M m² was a YOY decrease of 2.8%; average shipment size of 48.9" was a YOY increase of 0.6"; factors such as decreased demand in developed markets and the increasing price difference of LCD TVs has slowed the shipment of premium OLED TVs, resulting in 2022 global OLED TV shipments amounting to 6.7M, a YOY increase of 3.2%.

The 2022 further decrease of demand for TVs in foreign markets was most pronounced in the U.S. and European markets. Shipments from Korean brands that primarily target foreign markets decreased significantly while China's leading brands maintained their domestic lead. Under the guidance of a strategy of aggressive expansion into foreign markets, shipping volume grew rapidly based on their industry chain and cost advantages; TV shipments by Hisense and TCL exceeded LG Electronics for the year as they took 2 of the top 3 spots in terms of shipping volume.

The popularization of 8K TVs, MiniLED, artificial intelligence, and IoT technology as well as the annual price decrease of large TVs will be the key factors that impact development of the TV industry in 2023. Due to stimulation from new technologies, price decreases, and the launch of 8K gaming machines, demand for TV replacements have gradually spread in the market; The decline will likely end in H2 of 2023 or 2024 and begin to recover.

全球季度電視出貨量(百萬台)

Worldwide Quarterly TV Shipment Volume (million units)

Source: IDC 2019-2022 Worldwide Quarterly TV Shipment Volume

B. EV and car industry

A review of 2022 new energy vehicle sales in the China region indicates that a total of 4.559 million vehicles were sold in the first three quarters of 2022, a YOY increase of 112.7%, annual cumulative penetration rate of 23.4%, and an increase of 10 percentage points compared to 2021. In September 2022, the sale of new energy vehicles in a single month surpassed 700,000, increasing

penetration rate to 27.1%. The industry is entering a market driven stage and penetration rate can be expected to further increase.

The policy is transitioning to high quality development throughout the industry chain and the industry is fully entering a "market" driven mode. The technical roadmap 2.0 has set 2025, 2030, and 2035 as key nodes in the development of new energy industries. It's estimated that new energy vehicles will become mainstream in 2035, accounting for more than 50% to achieve the electrification of the car industry.

We estimate that sales of new energy passenger cars in 2023 will reach 9.08 million vehicles with an annual penetration rate of 37%. On one hand, as the scaling effect of new energy vehicle manufacturers emerges and the industry gradually reaches maturity, pressure from market competition will cause some manufacturers to adopt price cuts to drive extended sales; on the other hand, the ever increasing oil prices in recent years, an increase of nearly 50% since early 2021, has resulted in the life cycle costs of new energy vehicles in becoming more advantageous than gas vehicles, further increasing their competitiveness in the market. Based on the background of purchasing replacement vehicles, consumers vehicle purchases will become more rational and the cost performance advantage will accelerate penetration of new energy vehicles.

Market Penetration Rate

新能源商用車	New energy commercial vehicles
渗透率	Penetration rate

C. Server industry

Market intelligence provider TrendForce recently predicted that global shipment volume of whole machine servers will grow by approximately 3.7% in 2023, a decline from the 5.1% forecast in 2020. North America's 4 major cloud service providers each decreased their procurement of servers in 2023. The degree of decline in descending order is Meta, Microsoft, Google, and AWS. TrendForce estimates that the server procurement by these 4 providers would be decreased from the original forecast of 6.9% YOY growth to a decline of 4.4%.

From the perspective of DRAM capacity of whole machines, TrendForce predicts that the cost of DDR5 DRAM introduced with next-gen CPUs will significantly increase costs. In order to manage the pricing of whole machines, manufacturers may limit the average capacity of DRAM installation in machines; therefore, it is predicted that speed increase will fall at approximately 7% in 2023, making it the first time it has fallen below 10% since 2016. However, the institute also mentions that the DRAM market is undergoing a downward trend and price quotes obtained by tier 1 manufacturers in the third quarter has reached new historic lows. As such, further discounts by original manufacturers in the coming year may stimulate server manufacturers to increase the device capacity of DRAM.

What's certain is that all parties are maintaining optimism towards 2023 server sales. Considering the X86 server chips by Intel and AMD's as well as the ARM server chips by AWS, Ampere Computing, Huawei/Hisense, and Alibaba will launch in 2023, the optimism is not unwarranted.

Source: IDC 2021-2026 Forecast of Worldwide Server Markets

D. Communications equipment

In 2022, countries such as the U.S., China, and UK have actively accelerated the deployment of low earth orbit (LEO) satellites. This growth has been driven by the International Telecommunications Union's (ITU) specifications towards orbit and spectrum as well as the massive increase of global demand in bandwidth. Additionally, satellite internet is seen as the primary communications solution for remote areas, rural villages, and both aerial and naval modes of transportation. The combination of satellite communications technology and ground-based networks have led to the development of hybrid networks to increase bandwidth and coverage rate. TrendForce predicts that the 2023 output value of the global satellite industry will reach US\$308.3 billion and an annual growth rate of 4.5%.

The supplementary nature of low orbit satellites have become a supplement or alternate solution to ground-based networks and enhances the M2M network for integration with the B5G/6G hybrid solutions that are currently in the development phase. Due to compliance to the planning of 3GPP Rel-17 non-terrestrial networks (NTN), there will be further opportunities for partnerships in the mobile communications and satellite communications industries, which will hopefully lead to the creation of new industry structures.

2. Correlation of upstream, midstream, and downstream industry

The Company is engaged in precision mold manufacturing, metal stamping, plastic injection molding and other components products. Upstream raw materials are supplied by well-known domestic and foreign manufacturers and downstream customers are internationally renowned manufacturers. The company's long-term stable operation management has established excellent partnerships with upstream and downstream manufacturers and can obtain first-hand information to facilitate decision-making. The following figure shows the upstream, midstream and downstream relations of the industry at the current stage:

Upstream	Midstream	Downstream
Raw materials	Design, manufacturing	Application customers
Metallic materials	Mold making	Consumer electronic
		customers
Plastic materials	Metal stamping	Communication industry
		customers

	electrodeposition,	
	printing, laser carving	

3. Product development trend and competition

The Company's various internal and external machine component products are used in a wide range of applications. Currently, they are mainly used in consumer electronic products and information and communication (ICT) products. Therefore, changes in economic climate and

technological development renders considerable impact on the production and sales of the Company.

In addition to competition in terms of functionality, consumer electronics products now emphasize the diversity of appearance. Therefore, for the selection of materials for machine components, the proportion of metallic materials used is gradually increasing from the early plastic materials. Due to the high heat dissipation and high strength properties of metallic materials, and the integrated molding process, products can be made thinner and lighter, can be placed into more powerful electronic components without affecting its performance, and can be surface treated to improve the quality of appearance. These advantages have made metal components an increasingly popular application.

In terms of future development, plastic raw materials remain the most cost effect material and can also be surface treated to improve quality. Therefore, end sellers can select different raw materials for product parts to differentiate products based on price, appearance and function. Moreover, as market economy continues to develop, it will continue to draw demand for various consumer electronic products, driving growth in the machine component industry.

4. Market Competition

The Company's main products include the design and manufacture of various consumer electronic components and molds. The main competitors include listed companies such as B-TEK, Chia Group and Coxon Group. Despite widespread competition, the Company continues to deepen customer relationships, engage in long-term stable cooperation with international companies, receive customer recognition in terms of product yield, and thus obtain orders. In terms of professional technology, the Company also performs metal stamping, plastic injection molding and various surface treatments to meet the customers' diverse product requirements; In terms of production capacity, we continue to expand our plant equipment according to market demand, and actively develop new products.

5.1.3 Technological research and development

1. Technical level and R&D of the business

A. Technical level:

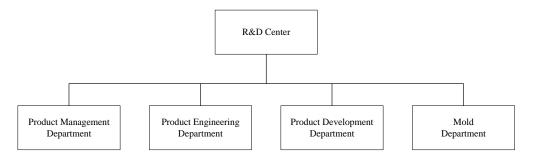

Along with the diversification of 3C electronic products and thriving industry environment, the demand for components is becoming more sophisticated, and the requirements for product appearance are also elevating. Therefore, the technical capacities of mechanical parts manufacturers will be healthy challenges. In response to the various needs of customers, the Company continues to strive for breakthroughs and innovations, and has introduced the following technologies and manufacturing processes:

- a. High-gloss metal polishing technology, to provide new options for appearance treatment of metal materials.
- b. LED TV thin edge metallic frame products, to provide a spacious visual appearance.

- c. The aluminum's two-tone anodized surface treatment creates a fashionable sense based in technology.
- d. Ultra glossy anodic surface treatment offers new options for external aesthetics.
- e. CAE (computer simulation analysis) software assistance, to reduce the risk of product structure and mold design anomalies.
- f. Development of molding technology for thin materials, to be applied to casings of medium and large LED TVs.
- g. Precision sheet metal deep drawing die technology, to be widely applied in consumer electronics and automotive products.
- h. Aluminum composite panel stamping processing technology and precision side slot processing technology.
- i. 3D brushed surface treatment technology
- j. LED TV unibody base bracket product technology.
- k. Introduction of visual inspection system to replace traditional manual inspections or more laborious inspections of workstations, thus improving production yield and reducing labor costs.
- 1. In summary, the introduction of automated production lines replaces the manual production and inspection roles in traditional workstations to improve yield and decrease labor costs.
- m. Introduction of technology processes such as ultrasonic welding of plastic parts, heat-press coating of leather, and in-mold tapping and riveting.

B. Technology development:

The Company has set up an R&D department at the time of its establishment. After successive integration and restructuring, it now has an R&D center, which is mainly responsible for product development, testing, mold design and development, product mass production and customer technical support. The product development department is responsible for product development and testing. The mold design department is responsible for the research and development of new mold technology, the design and development of new product molds and the configuration of forming processes. The product management department is responsible for reporting new product schedules to the customer, providing the necessary technical support to relevant departments and leading technical reviews with customers during the early stages of new projects. The product engineering department is responsible for the improvement of production process development and improvement and provides necessary technical support to relevant departments and customers. The organization chart of the R&D center is as follows:

(1) R&D expense invested in the last five years

Unit: NT\$ thousands

Year Item	2019	2020	2021	2022
R&D expense	189,286	195,630	199,936	152,333
Operating revenues	10,102,252	9,889,935	12,042,445	14,031,536
Ratio of R&D expenses to operating income (%)	1.87	1.98	1.66	1.09

2. Successful developed technologies or products in the last five years

Year	Research and development achievements	Explanation of research and development achievements	Scope of applications
2018	A handcrafted hammered appearance of the TV base	As consumers' demand for TV base products further increases, the cost performance and appearance requirements will continue to elevate. In addition to an appealing appearance, the product reduced development costs and simplified the parts processing technology and assembly method. The product processing method: Appearance is a combination of hand-made hammered + spray paint + printed, with high practicality, low cost, novel appearance, and easy assembly.	Suitable for TV base support

Year	Research and development	Explanation of research and development achievements	Scope of applications
	achievements Smart courier box retrieval device	Smart courier boxes have emerged as a result of the rapid development of e-commerce, and can be easily spotted in local communities, office buildings and schools. The smart courier cabinet is considered to be a more cost-effective way to solve the "last mile" of the express package problem. As referred to by the industry. The essence of the smart courier cabinet is a shared economic model, which enhances the delivery of the "last mile" of the courier service, improving the logistics service and public recognition. The invention of the anti-theft structure project designed to improve the additional functions of the courier shipping device achieves the following beneficial effects: The gear transmission transfers the courier bags one by one from the storage bin to the retrieval door. In the process, one courier bag is allowed to pass through another valve and scanned for code for retrieval. The pop-up valve structure, which serves as the ball splitter structure, also prevents jamming the ball, further improving device safety.	Suitable for courier cabinets
	Courier cabinet with printer	Adding a printer to the original smart courier cabinet, which prints bar codes containing corresponding messages from the smart handheld device, simplifying the conventional packaging method. Optimizing the design of the courier box, improving the convenience of the paper replacement process for maintenance personnel, thereby optimizing efficiency and reducing personnel costs.	Suitable for courier cabinets
	A high-strength plastic application for TV base	In the context of the rapid development of new flat-panel TV technology, the base is not only a carrier for support but also a new competitive edge by providing aesthetic and unique appearance. This forces us to optimize and innovate the production process. Compared with other processes, the composite plastic molding technology we use can make the products lighter, save raw materials, improve production efficiency, and enhance product formability.	Suitable for TV base support
2019	A quick release base technology	A quick-release base function is designed to facilitate the arrangement of cables on the back of the TV. The TV cables seen on the market are cluttered and exposed, undermining the simplistic styles of TV designs. The quick-release base tidies abrupt cables and the external appearance. The improved convenience can hardly be replaced in the near future. Due to the low production cost, diverse advantages, and high functionality, successful development of this technology will see widespread applications in the future market.	Suitable for TV base support
	A fast maintenance structure applied to courier cabinets	In the context of the rapidly developing new smart courier cabinet, to identify the user's express delivery item number, a printer is frequently used to print the barcode and have it attached to the express item for identification. The existing courier box is mostly a fixed box-type structure, and the printer is secured by screws inside the box unit, rendering the replenishment of printer materials a cumbersome process. As a result, this project was designed to improve the convenience of repairing and replacement of accessories, thereby cutting maintenance cost.	Suitable for courier cabinets
2020	A jig structure for injection molding processes	A new robotic arm jig structure that can complete material gathering and loading actions within molds was designed. Activating the control system returns the gathering board to its original position. The robotic arm moves upward along with the jig and rotates the jig when the position is reached. The robotic arm continues moving until it is out of the injector. When it reaches the loading position outside of the machine,	Automated material gathering for injection molding

Year	Research and development achievements	Explanation of research and development achievements	Scope of applications
		the suction cup will activate and remove the finished product.	
	A hot pressing process for vehicle interior trims	An in-mold, edge cutting and hot press process was developed. The product's contour is formed in a single operation through in-mold thermal cutting jigs, reducing the need for later secondary processing.	Vehicle carpet interior trim
	A friction welding process	A plastic friction welding process was developed. The jig presses the contact surfaces of the two assemblies to be welded together, causing them to heat by friction. The surfaces melt under the heat and fuse together under the pressure. The weld seal is firm and can withstand 0.3 Mpa under pressure resistance tests.	Car speaker parts and products that cannot be ultrasonically welded
	A composite process for vehicle interior trims	A composite technology suitable for vehicle interior trims was developed. The special jig fixes the plastic parts of the substrate and a foaming machine is used for foaming at the armrests. Then, the sewn PVC leather is placed on the jig and the spray glue process glues the two together, and finally the compression molding flexer-flanger completes the fastening.	Suitable for vehicle interior trims
2021	A car seat frame welding process	A car seat frame welding process was developed. A special clamping jig fixes the product and a robotic arm performs the CO2 welding. The components are tested for weld-bead quality with a penetration tester.	Suitable for car seat frames and other body brackets
	An automated vehicle battery assembly process	An automated vehicle battery assembly process was developed. A handling robotic arm, butt-welding robotic arm, riveter, and air tightness tester uses a master controller to control the actions of each device to complete multiple processes on one assembly line.	Suitable for the assembly of battery parts
	A type of padding for car seats	A plastic ultrasound welding technique was developed where the contact surfaces of two assemblies were pressed together in jigs then heated through ultrasonic vibrations. The contact surfaces are melted by the heat and welded into one assembly through the continued application of pressure. The weld location can withstand tensile forces of up to 50 kg.	Suitable for vehicle interior trims
2022	A type of automotive ventilation conduit	A plastic friction welding process was developed. The jig presses the contact surfaces of the two assemblies to be welded together, causing them to heat by friction. The surfaces melt under the heat and fuse together under the pressure. The product assembly can withstand tensile forces of up to 20 kg.	Suitable for vehicle interior trims
	Single type of wire harness and pipe clamp for cars	The utility model patent is applicable to car products, especially in products with complex structures and a wide range of integrated circuits which have higher requirements for the arrangement and structural deployment of wires. The utility model patent is for a new type of wire harness and pipe clamp that acts as an assistive tool for cable management in cars. It features the advantages of a simple structure, broad applications, low price, and strong applicability.	Applicable to cars

Year	Research and development achievements	Explanation of research and development achievements	Scope of applications
	A type of storage box	With the production transformation of China, single-use turnover boxes are now requiring features such as ecofriendly and maximized cost-savings; the project is a new type of recyclable plastic box: it offers outstanding features such as aesthetics, structurally strong, low cost, and ease of production. Not only does the product feature high applicability, it can be customized to the shape and size of various products to drastically reduce shipping costs for short-range logistics and product turnover.	Packaging and transportation
	A type of device for the securing and removal of servers	The server securing and removal device developed by the Company utilizes a die-cast material molded once then assembled to form a set of modular parts. It offers the advantage of low costs for opening molds, ease of cleaning or replacing damaged parts, and can be disassembled without tools. It's excellent for reducing manufacturing processes, reducing costs, and facilitates the production, assembly, and after-sale servicing of products. It will offer greater survival and technical advantages in the future of the server market.	Applicable to servers

5.1.4 Short-term and long-term business development plans

1. Short-term development

- A. Compete for repeat orders and develop new customers.
- B. Cultivate the relationships between customers and upstream manufacturers and cooperate to create mutually beneficial situations.
- C. Improve process efficiency, expedite production and improve consistency, and enhance product value.
- D. Strengthen the design capacity of the R&D team, and deepen research on TV bases, IoT products, and traditional industrial products and processes.

2. Long-term development:

- A. Continue research and development, expand diverse market product lines, and maintain competitive edge.
- B. Carry out overseas strategic planning, provide local customer service and create business opportunities.
- C. Provide one-stop service, optimize the design R&D to production process, shorten design cycle, enhance product quality, lower production cost, and thus improving customer satisfaction.

5.2 Market and sales overview

5.2.1 Market analysis

1. Main products (services) sales (providing) area

Unit: NT\$ thousands

Calas Ama	2021		2022		
Sales Area	Amount	Ration (%)	Amount	Ration (%)	
China	3,251,527	27.00	2,740,444	19.53	
America and Europe	6,149,655	51.07	9,002,432	64.16	
Other	2,641,263	21.93	2,288,660	16.31	
Total	12,042,445	100.00	14,031,536	100.00	

2. Market share

The Company is a professional mechanical assembly plant with vertical integration capacity from product and mold design, metal stamping, plastic molding, various surface treatment processes, to parts assembly. The products are widely used in the automotive industry, information industry, communication equipment, and even lighting products. The Company has accumulated years of experience in mold development, design and manufacturing over a wide range of product specifications. It has professional mold development and design capabilities, and its operating income is growing year by year. The Company has established a foothold in the industry in terms of company scale, production technology and order-taking capacity.

3. Future market supply and demand and the growth

The machine components currently produced by the Company are mainly used in LED TVs new energy vehicles and server. At present, large-size TV has established itself a market trend as a mainstream commodity. Moreover, to increase product quality and support strength, large-size TVs require an integrally formed metal frame as a backbone support. Therefore, manufacturers with integrated molding process capacity and surface treatment technology will benefit from this growth trend.

ESON also has experience in large plastic part and stamped aluminum part manufacturing, which can be transformed for use in alternative fuel vehicle part development, achieving continuous revenue growth as the alternative fuel vehicle market expands day by day.

The Company is currently one of the few companies in the industry who are capable of designing and manufacturing large-size LED TV components and new energy vehicle components. The mechanical parts industry is expected to maintain a certain growth momentum in the face of continued growth in market demand and a relatively tight supply of large-size products.

4. Competitive niche

A. R&D design and independent mold making capacity

The Company has excellent ODM research and development capacities, and has authorized and applied over 31 patents, has the capacity to produce its own molds, and improve processing technology and production line efficiency through improvement of mold designs.

B. Complete production line

The Company started its business in the field of metal molds and metal stamping, and subsequently participated in plastic injection molding process, plastic mold manufacturing and surface treatment. These processes cover most of the machine components. In response to various requirements for product materials of the end consumer market, the wide range of processes can also divert market risks.

C. Overseas planning, close collaboration with customers

The Company's customers are mostly international OEMs and renowned brand manufacturers. To meet the local customer shipment requirements, reduce shipping time and shipping costs, and substantially shorten the length of the supply chain, the Company has launched strategic overseas plans since its establishment. Currently, the Company has factories in China, Mexico and Vietnam.

In addition, the Company sees future growth opportunities in the ASEAN and has added the Malaysian plant to meet the production needs of the Southeast Asian market.

D. A wide range of products, expand new business opportunities

In addition to the current large-size TV products, the Company is involved in a range of competitive niche to sustain continued future development, including current development of cloud server infrastructure and automotive and home appliance molds, and joint product development with a number of new venture businesses.

5. Advantages and disadvantages of future development and the countermeasures

A. Advantages of future development

a. Excess market penetration of large-size TVs Due to a large increase in global shipments of 4K LED TV panels, especially driven by the demand for new stock products and public events, the increase in panel size has resulted in the growing penetration of large-size LED TVs.

b. High technical and capital thresholds, establish competitive edge In order to meet customization requirements, metal machine components require high mold development technology and surface treatment capacities. For example, complex unibody molding machine components must be processed using large CNC milling machines, which require extremely high production costs.

The Company has vertical integration capabilities from product and mold design, metal stamping, plastic molding, to various surface treatment processes and parts assembly. In recent years, it has actively purchased CNC machines to manufacture large-sized machine components and continues to expand overseas in response to order demands. Therefore, the Company has established a foothold in the industry, with a clear competitive edge.

c. Establish long-term stable cooperative relations with international manufacturers
The Company's main customers are international assembly and brand manufacturers. To
serve customers, the Company has gradually set up factories overseas to locally take
orders and locally ship products, thus expediting and improving the quality of customer

communications. Moreover, based on excellent technical capacities, the Company has obtained customer trust and professional certifications, thereby establishing stable long-term cooperative relations. \circ

B. Disadvantages of future development and the countermeasures

a. New entrants increase competition and drive down profitability

To participate in industry transformation and increase profitability, traditional plastic injection molding manufacturers started to partake metal components production and compete for market share with low product prices.

Response measures:

Based on excellent technology and design capacities, the Company continues to improve processes and production line efficiency. At the same time, it has a well-established strategic overseas layout. The Company has established a competitive advantage and strong foothold in terms of customer relations, capacity expansion and product applications.

b. Impact of alternative raw materials

In response to lightweight and compact requirements, 3C products need to use highstrength, high-heat-dissipating materials. Based on the common materials used in current mechanical components, metallic materials are superior to plastic materials in terms of strength and heat dissipation. However, the development of plastic (polymer) composite materials, such as glass fiber and carbon fiber materials, are now on par with metallic materials in terms of strength and heat dissipation, which will impact the development of metal mechanical parts.

Response measures:

The choice of material of the machine component will affect the appearance and durability of the product. Considering material cost and strength, the metallic components remain the mainstream option. The Company will follow closely the development trend and continue to assess the feasibility of new material applications and refine the existing technology to enhance competitiveness.

5.2.2 Application of Major Products

1. Major products and their main uses

Major Products	ects Main Use	
Mechanical parts	Various consumer electronics, optoelectronic products	
Tooling	Automotive mold and machine component mold development	

2. Major products and their products process

A. Mechanical parts manufacturing process		B. Mold making process
Forming	Stamping	Mold making 3D Model
Blanking	Blanking	Product view
Injection molding	Stamping Punching/embossing/burring punch/tapping	Mold diagram design review
Applying protective film	Full inspection	Mold processing assembly
Clean oil stain	Package	Mold test
Burring	Shipment	Production/transfer molding
Package		
Shipment		

5.2.3 Supply of major raw materials

Major raw materials	Supply Situation
Plastic pellets	Good
Steel	Good
Tooling steel	Good

5.2.4 Major Customers with over 10% net sales and Suppliers with over 10% total purchases of the last two fiscal years

Unit: NT\$ thousands

1. Major Suppliers of the last two fiscal years

2021			2022				
Suppliers Name	Amount	%	Relationship with the issuer	Suppliers Name	Amount	%	Relationship with the issuer
N	1,132,411	13.63	-	N	1,797,655	21.45	-
S	542,708	6.53	-	S	967,122	11.54	-
Other	6,630,271	79.84	-	Other	5,614,843	67.01	-
Net Purchases	8,305,390	100.00	-	Net Purchases	8,379,620	100.00	-

Due to the sale volume increased for Automobile Parts, the steel purchase in increase.

2. Major Customers of the last two fiscal years

	2021				2022			
Company Name	Amount	%	Relationship with the issuer	Company Name	Amount	%	Relationship with the issuer	
С	3,098,550	25.73	-	С	5,092,646	36.30	-	
D	1,939,180	16.10	-	D	2,184,676	15.57	-	
A	2,169,998	18.02	Note1	A	1,936,940	13.80	Note1	
Other	4,834,717	40.15	-	Other	4,817,274	34.33	-	
Net Sales	12,042,445	100.00	-	Net Sales	14,031,536	100.00	-	

Note 1 : Investor company and its subsidiaries that account for the Company using the equity method • The production volume for Automobile Parts raised, so overall sale amount increased.

5.2.5 The production volume and value of the last two years

Major product		2021			2022			
Major product	Capacity	Volume	Value	Capacity	Volume	Value		
TV Mechanical Parts	123,310,000	98,648,000	5,642,600	48,625,000	38,900,000	4,089,000		
Automobile Parts	61,653,250	49,322,600	4,491,330	40,875,000	32,700,000	6,850,000		
Server Parts	22,393,750	17,915,000	2,356,500	50,625,000	40,500,000	3,635,000		
Molds and Other	85,863,131	68,690,505	852,850	48,213,625	38,570,900	862,050		
Total	293,220,131	234,576,105	13,343,280	188,338,625	150,670,900	15,436,050		

The production volume for server parts raised, so overall sale amount increased, and output value was increased due to the production of large mechanical parts.

5.2.6 Sales quantities and values of the last two fiscal years

		2021				2022			
Major product	Lo	cal	Ext	port	Loc	cal	Exp	oort	
	Quantity	Amount	Quantity	Amount	Quantity	Amount	Quantity	Amount	
TV Mechanical Parts	-	-	89,359,590	5,092,982	-	-	35,274,935	3,715,667	
Automobile Parts	-	-	44,570,349	4,033,012	-	-	29,726,460	6,230,656	
Server Parts	-	-	16,380,465	2,139,873	-	-	36,734,803	3,301,905	
Molds and Other	-	-	62,520,563	776,578	-	-	35,045,837	783,308	
Total	-	_	212,830,967	12,042,445	-	-	136,782,035	14,031,536	

The growth of electric vehicles in 2022 led to an increase in the sales of mechanical car parts.

5.3 Status of Employees

Unit: People; Year; Year Old

	Year	2021	2022	March 31, 2023
N. 1. C	Direct labor	3,449	2,603	2,857
Number of employees	Indirect labor	1,605	1,164	1,067
employees	Total	5,054	3,767	3,924
Average age		32.6	33.1	25.9
Av	verage years of service	3.87	4.00	6.50
	Doctor Degree	-	1	1
Academic	Master's Degree	4	9	7
qualification	Bachelor's Degree	1,597	569	572
	High School	3,453	3,189	3,345

5.4 Expenditure on Environmental Protection

5.4.1 According to laws and regulations, the following details the applications, payment, or establishment of pollution facility establishment permit, pollution discharge permit, pollution prevention cost or environmental protection personnel.

The Company is required to apply for pollution discharge permits in accordance with local laws and regulations due to the production process, as follows:

(1) Pollution facility establishment, pollutant discharge permit

Plants	License	Expiry date	Certificate number
Wuxi Singuan	Pollution discharge permit	2023.01.16-2028.01.15	91320205795372851M001X
Multiwin de Mexico S.A. De C.V.	Wastewater discharge license	2021.01.14-2022.01.13 Patent pending	TIJ-I-00169/16
Multiwin de Mexico S.A. De C.V.	Exhaust emission license	2020.09-2021.06 Patent pending	TJ-881/13E5

- (2) Establish environmental protection special units responsible for environmental protection projects such as environmental protection engineering construction and technology development, environmental operation performance management, energy conservation and emission reduction promotion, and waste resource recovery technology development.
- 5.4.2 Explain the Company's improvement of environmental pollution for the recent year and until the issuance of the annual report, and any pollution disputes and its disposal.
- 5.4.3 Explain the total amount of damages (including compensation) and the company's future response measures (including improvement measures) and possible expenses (including the estimated amount of loss, disposition and compensation incurred due to failure to take countermeasures; if it cannot be reasonably estimated, explanation shall be provided that it cannot be reasonably estimated) in the past two years until the issuance of the annual report.

None

None

5.4.4 Explain the current impact of pollution prevention and improvement on the Company's earnings, competitive advantage and capital expenditures and the estimated major environmental capital expenditures in the next two years.

(1) The current impact of pollution prevention and its improvement on the Company's earnings, competitive position, and capital expenditure.

In the past two years until the issuance of the annual report, the Company has not had any impact on the surplus, competitive advantage, and capital expenditure due to pollution.

(2) Major environmental capital expenditures expected in the coming years:

Equipment name	Quantity	Expected date of acquisition	Estimated investment cost	Use and anticipated benefit	
Operation and maintenance of online surveillance instrument for sewage station	1	per year	RMB 468,000	(COD, ammoniacal nitrogen, total phosphorus, total nickel and other water pollution factors) Equipment maintenance a Monitor wastewater discharge compliance	
Operation and maintenance of pollution source online monitoring system (volatile organic compounds)	2	per year	RMB 300,000	VOCs online monitor operation and maintenance, monitor exhaust emission compliance	
Maintenance of eco- friendly waste gas facilities	1	毎年		Replacement of activated carbon in waste gas management facilities and the replacement and repair of fans.	

5.5 Employer and Employee Relationships

5.5.1 Employee benefit policies, continuing education and training, work environment for the employees and personal safety protection, the retirement system and the implementation of the system, labor-management consultation and agreement, and the protection of labor rights.

(1) Employee welfare measures

In addition to the health insurance and labor insurance requirements of the Labor Standards Act of the Republic of China, the employee welfare measures of the Company's Taiwan branch include accident insurance and the labor individual retirement account system to protect employee-related benefits.

In addition to social insurance and housing deposit reserve, Chinese employees have regular promotion opportunities each year to reward outstanding employees and year-end bonuses based on the Company's operating performance. During major holidays, the Company organizes dinner parties and provides annual meal subsidies for various central departments; year-end lottery; to encourage employees in all positions to increase efficiency and reduce costs, bonuses are paid to working proposals.

The employee welfare measures of other overseas operating locations are basically in line with local social security requirements.

(2) Education and training

The Company pays attention to personnel and on-the-job training to improve overall employee

quality and work skills:

A. Pre-employment training

The new recruits are trained by the management department according to function of the work post and new recruit conditions prior to work, so that the new recruits can understand the Company's development history, corporate culture, management rules, industrial safety, environmental management, production process, quality control, GP/GA knowledge and relevant legal contents, and concepts.

B. Professional training prior to assuming post

Before special and professional staff and personnel of nationally specified risky/special positions officially assume post, the management department shall guide the units of employment to carry out professional pre-employment training or commissioned external training. The management department shall maintain and manage relevant training and qualification records of job transfers.

C. On-the-job training (including senior management)

Train current on-the-job employees in the Company. The management department timely organizes or uses external training or video education to conduct management training to various levels of the management.

D. Professional skills training

On-the-job product designers or engineers should maintain proficiency over applicable basic skills and receive training to ensure they meet the skills requirements, with emphasis on improving current skills.

(3) Retirement system and implementation status

The Taiwan branch has established an employee retirement-related system in accordance with the Labor Standards Act. The pension is paid by the Company at 6% monthly salary to the individual's labor pension account.

The Company's main operating base is located in China. The Company has been paying five social security funds on a monthly basis, including employee pension security to the local social security bureau. Upon reaching the statutory retirement age, the employee can apply for a pension from the social security bureau.

The employee pension system of other overseas operating locations are basically in line with local social security requirements.

(4) Employer-employee relations and employee rights maintenance measures

The Company's relevant provisions of the collective bargaining agreement are handled in accordance with the law. In addition, the Company greatly values employee's rights and interests. To strengthen labor relations and enhance employee's cohesion, the Company actively communicates with employees, and strives for people-oriented management. In addition to setting up a complaints window and a service team, employees can provide feedback at any time via email or mail box. At present, the labor-management communications channel is open and in good operating condition.

(5) Preventive measures taken to protect safe working environment and employees' personal safety

The company has passed ISO14001 environmental management system standards, OHSAS18001 occupational safety and health management and ISO/TS6949 automotive and quality management systems.

The Company has established the "Safe Production Reward and Punishment Measures" to achieve zero injuries and zero accidents through pre-employment training, professional job training, on-the-job training, and professional skills training.

5.5.2 Any current or potential loss resulting from labor disputes and prevention actions for the past two years and as of the date of this annual report

The labor-management disputes of the Company are mostly compensation for work-related injuries caused by traffic accidents, or occupational injuries caused by improper machine operations. At present, all relevant labor disputes have reached settlements. Because the dispute cases are small compensations, they have no substantial impact on the operation of the Company.

5.6 Cyber security management:

I · State clearly the cybersecurity risk management structure, cybersecurity policy, specific management plan, and resources invested in the management of cybersecurity:

The Company has adopted the rule of cyber security. The Information Technology department is responsible for coordinating with department heads of information, each business unit, internal audit, legal compliance, and human resource, holding regular meetings to announce and inform about cyber security events, making decisions about cyber security matters and further managing and promoting such matters. All of above are to implement the rule of cyber security, to protect cyber security and rights of stockholders, and to achieve the goals of cyber security.

Cyber security threats that the Company currently faces include mainly unexpected interruption of service, data loss, confidential information leakage and all sorts of cyberattack, and the Company has taken the following cyber security protective measures:

- 1.Unexpected interruption of service and data loss: The Company has adopted a hyper-converged host infrastructure, a virtual host for remote backup, and two copies of data backup on two storage media with one of the copies located offsite. Data backup and recovery and remote backup drills are held on a regular basis to ensure uninterrupted operation and no data loss.
- 2.Confidential information leakage: The Company has strengthened its authorization management mechanism and established an authorization management platform to control the real-time authorization status for each system. Confidential documents and key information are controlled by the restriction copies, downloads and outward mail ensuring the security of confidential information.
- 3.Cyberattack: The Company has reinforced its firewall defense, increased inspection on cyber activities from high-risk regions, checked updates for anti-virus software and operation system daily and randomly, built functions such as blacklist filter and credit score system to block malicious mail, and promoted the concept of cyber security regularly to prevent threats of cyberattacks.
- II State clearly any losses, possible impacts, and countermeasures caused by significant cybersecurity incidents in the year prior to the annual report publication date; if they cannot be reasonably estimated, an explanation must be made as to the fact that they cannot be reasonably estimated:
 None

Analysis of financial ratio differences for the last two years. (Not required if the difference does not exceed 20%)

- 1. Interest earned ratio (times) decreases which was mainly due to the increases of interest expenses.
- 2. Return on total assets increases which was mainly due to the increases of profit for the year.
- 3.Return on stockholders' equity increases which was mainly due to the increases of profit for the year.
- 4.Pre-tax profit to paid-in capital (Profit of operation) increases which was mainly due to the increases of Profit of operation.
- 5. Pre-tax profit to paid-in capital (Pre-tax profit) increases which was mainly due to the increases of Pre-tax profit
- 6. Profit ratio increases which was mainly due to the increases of profit for the year.
- 7. Earnings per share increases which was mainly due to the increases of profit for the year.
- 8.Cash flow ratio increases which was mainly due to the increases in cash flows from operating activities.
- 9. Cash reinvestment ratio increases which was mainly due to the increases in cash flows from operating activities.

Note 1: The financial information from past five years has been audited by CPA

Note 2: The formula is as follow:

- 1.Financial structure
 - (1) The ratio of total liabilities to total assets = total liabilities/total assets
 - (2)Ratio of long-term capital to property, plant and equipment = (Total equities + noncurrent liabilities) /property, plant and equipment.

2.Solvency

- (1)Current ratio = current assets / current liabilities.
- (2) Quick ratio = (current assets inventories prepaid expense) / current liabilities.
- (3)Interest coverage ratio = net profit before interest and tax / interest expenses for the current period.

3. Operating efficiency

- (1)Receivable (including accounts receivable and notes receivable arising from business operation) Turnover = Net sales / average receivable (including accounts receivable and notes receivable arising from business operation) balance.
- (2) Days sales in account receivable = 365 / Account receivable turnover (times).
- (3)Inventory turnover (times) = Cost of goods sold / average inventory amount
- (4)Payable (including accounts payable and notes payable arising from business operation) Turnover = Cost of goods sold / Average payable (including accounts payable and notes payable arising from business operation) balance.
- (5) Average days in sales = 365 / Inventory turnover (times).
- (6)Property, plant, and equipment turnover (times) = Net sales / Net average property, plant, and equipment
- (7)T Total assets turnover (times) = Net sales / Average total assets

4.Profitability

- (1) Return on assets = (after tax net profit + interest expenses x (1- tax rate)) / average asset balance.
- (2) Return on shareholders' equity = after tax net profit/ total average equity.
- (3)Profit ratio = net income/net sales.
- (4)Earnings per share = (profits or loss attributable to owners of the parent company preferred stock dividend) / weighted average stock shares issued.

5.Cash flow

- (1) Cash flow ratio = net cash flow from operating activities / current liabilities
- (2)Cash flow adequacy ratio = net cash flow from operating activities within five years/(capital expenditure + inventory increase + cash dividend) within five years.
- (3)Cash re-investment ratio = (net cash flow from operating activity cash dividend) /(gross property, plant, and equipment + long-term investment + other noncurrent assets + working capital).(Note 4)

6.Leverage:

- (1)Operating leverage = (Net operating income Changes in operating cost and expense) / Operating profit.
- (2)Financial leverage = Operating profit / (Operating profit interest expense).
- Note 3: If the Company's stock is without a face value or without a NT\$10 par value, the ratio to paid-in capital in the preceding paragraph is then based on the shareholder's equity ratio of the parent company in the balance sheet instead.

6.3 Audit Committee's Review Report

Audit Committee Agreement Report

The Audit Committee agrees with the consolidated financial statements, business reports and proposal for earnings

distribution in 2022, as decided by the Board of Directors. Among which, the consolidated financial statements of the

Company in 2022 have been issued with an unqualified opinion audit report after audit by Deloitte Touche Tohmatsu

Limited which was hired by the Board of Directors.

The Audit Committee is responsible for supervising the financial reporting process of the Company.

A certified public accountant has attested to the Company's consolidated financial statements for 2022 and

communicated with the Audit Committee on the following matters:

1. No critical findings were discovered in the scope and time of the audit as planned by the certified public accountant.

2. The certified public accountant has offered the Audit Committee an accountant who is affiliated with the firm and

follows the criterion of being independent as indicated in the Norm of Professional Ethics for Certified Public Accountant. No discovery was made that may be considered as affecting the independence of the accountants and

other matters.

3. Among matters discussed between the certified public accountant and the Audit Committee, the certified public

accountant has, in its audit report, clearly described the key audit matters that affect the Company's consolidated

financial statements. There are no laws that do not allow specific matters to be publicly disclosed or in very rare

cases, the certified public accountant decides not to audit for specific matters discussed in the report

The Audit Committee agrees with the consolidated financial statements, business reports and proposal for earnings

distribution in 2022, as decided by the Board of Directors. All are in compliance with relevant laws and regulations and

are reported as stipulated in Article 219 of the Company Act.

Please review.

Non-controlling interests	-	-	-	-
Total Stockholders' Equity	5,975,705	6,879,039	903,334	15.12

Description of major changes: (The amount changed by more than 10%, and reached 1% of the total assets of the year, which is NT\$119,872 thousands)

Current Assets increased: Mainly due to increase in account receivables.

Fixed assets increased: Mainly due to increase in land, plant and equipment.

Other assets increased: Mainly due to increase in investment property.

Total assets increased: Mainly due to increase in fixed assets.

Long-term Liabilities increased: Mainly due to increase in long-term loan.

Total Liabilities increased: Mainly due to increase in long-term loan.

Retained Earnings increased: Mainly due to increase in unappropriated earnings.

Exchange differences on translation: The impact of exchange rate changes.

Total Stockholders' Equity increased: Mainly due to increase in retained earnings

Data: The financial information has been audited by CPA

7.2 Analysis of Operation Results

Unit: NT\$ thousands

Year	2021	2022	Diffe	Difference	
Item	2021	2022	Amount	%	
Net Sales	12,042,445	14,031,536	1,989,091	16.52	
Cost of Sales	10,233,529	11,797,376	1,563,847	15.28	
Gross Profit	1,808,916	2,234,160	425,244	23.51	
Operating Expenses	1,165,961	1,397,490	231,529	19.86	
Operating Income	642,955	836,670	193,715	30.13	
Non-operating Income and expenses	(35,100)	226,162	261,262	(744.34)	
Income Before Tax	607,855	1,062,832	454,977	74.85	
Net Income	463,781	800,915	337,134	72.69	

Description of major changes: (The amount changed by more than 10%, and reached 1% of the total assets of the year, which is NT\$119,872 thousands):

- (1) Net Sales increase: Mainly due to increase in Automobile Parts.
- (2) Cost of Sales increase: Mainly due to increase in Net Sales.
- (3) Gross Profit increase: Mainly due to increase in Net Sales.
- (4) Operating Expenses increase: Mainly due to increase in Net Sales.
- (5) Operating Income increase: Mainly due to increase in Net Sales.
- (6) Non-operating Income and expenses increase: Mainly due to increase in Net Sales.
- (7) Income Before Tax increase: Mainly due to increase in Operating Income.
- (8) Net Income increase: Mainly due to increase in Income Before Tax.

Data: The financial information has been audited by CPA

7.3 Analysis of Cash Flow

7.3.1 Cash flow Analysis for the Current Year

Year	2021	2022	Increase (Decrease) Amount	(%)
Operating Activities	(323,345)	1,392,773	1,716,118	(530.74)
Investing Activities	(501,424)	(1,143,654)	(642,230)	128.08
Financing Activities	167,878	312,045	144,167	85.88

Analysis of financial change:

Net cash inflow from operating activities increased: Mainly due to increase in income before tax.

Cash outflow from investing activities increased: Mainly due to the decrease of disposal in financial assets at amortization cost.

Cash outflow from financing activities increased: Mainly due to increase in long-term borrowings.

Data: The financial information has been audited by CPA

7.3.2 Remedy for Cash Deficit and Liquidity Analysis and Cash flow Analysis for the Coming Year Not applicable.

7.4 Major Capital Expenditure

None

7.5 Investment Policy in Last year, Main Causes for Profits or Losses, Improvement Plans, and the investment Plans for the Coming Year

7.5.1 Investment Policy in Last Year

The Company's current investment policy mainly focuses on basic business-related investment targets and is not engaged in investments in other industries. Relevant executive departments adhere to the "Subsidiary Operation Management Measures", "Investment Cycle" of the internal control system and

"Acquisition or Disposal of Assets". The aforementioned methods or procedures are discussed and approved by the board of directors or at the shareholders meeting.

7.5.2 Main Causes for Profits or Losses, Improvement plan

As of Dec 31,2021; Unit; NT\$ thousands

Name of Company	Investment gain of loss in last year	Main Causes	
Multiwin Precision Ind Pte. Ltd.	98,944	Good operating condition

7.5.3 The investment Plans for the Coming Year

In the future, the company's main investment strategy is to focus on customers' strategic needs and basic

business-related investments. The scale of operations will be expanded on a case-by-case basis, and relevant executive departments will adhere to the internal control system and "Procedure for Acquisition or Disposal of Assets."

7.6 Analysis of Risk Management

7.6.1 Effects of Changes in Interest Rates, Foreign Exchange Rates and Inflation of Corporate Finance, and Future Response Measures

1. Interest Rate

The interest rate risk of the Company is mainly derived from the long-term and short-term bank loans required to support business and investment activities. In addition to strengthening close contact with banks and understanding interest rate movements to obtain the most favorable loan interest rates, the Company will also effectively use various financial instruments through sound financial planning to reduce the risk of fluctuating interest rates.

2. Foreign Exchange Rate

The daily operations of the Company use US dollars as a functional currency; The Company is mainly affected by fluctuations in the exchange rates of the renminbi to the US dollar. However, relevant risks on the Company's profits and losses are manageable. In response to the potential exchange risk and the impact of exchange rate fluctuations on profit and loss, the Company collects market information, conducts trend judgment and risk assessment, and maintains close contact with banks to fully grasp the trends in exchange rates and make appropriate adjustments, thereby reducing the risk of exchange rate fluctuations.

3. Inflation

The company's profit and loss has not been significantly affected by inflation. The Company will keep abreast of fluctuations in market prices and maintain good interaction with customers and suppliers, and suitably adjust its procurement and sales strategies. Therefore, the Company should be able to respond to the impact of future economic changes due to inflation or austerity, thereby reducing the impact on profit and loss.

7.6.2 Policies, Main Causes of Gain or Loss and Future Response Measures with Respect to High-Risk, High-Leverage Investment, Loaning or Endorsement Guarantees and Derivatives Transactions

The Company's financial policy is based on stable and conservative principles, and does not engage in high-risk, highly leveraged investment; In addition, the Company has established the "Operating Procedures for Lending Funds to Others", "Operating Procedures for Endorsement Guarantees" and "Procedures for Engaging in Derivatives Trading". All relevant operations are carefully implemented after considering risk conditions and related regulations. Other than Company-subsidiaries and subsidiaries-subsidiaries relations, the Company does not have endorsement guarantees and capital loans with other companies. Additionally, those already applied for endorsement guarantees and capital loan are handled in accordance with relevant operating procedures. The Company has not engaged in any derivative trading.

7.6.3 Future Research & Development Projects and Corresponding Budget

The Company's R&D expenditure in 2022 and 2021 were NT\$152,333,000 and NT\$199,936,000, accounting for 1.09% and 1.66% of the year's operating income. The combination of ESON's business and customer resources allowed for the use of engineering analysis in R&D design and resource integration to manufacture new products (cooling systems). In the future, this will be expanded to high-value applications with high heat flux density.

➤ Future R&D plans:

- 1. Design and development of high power CPU cooling systems
- 2. Introduce assembly and welding technology for cooling systems
- Expected future R&D investment: Approximately 1.7% to 2.5% of the annual net revenue.

7.6.4 Effects of and response to changes in policies and regulations relating to corporate finance and sales

The country of registration of the Company is the Cayman Islands, and its main operating countries include China, Singapore, Malaysia and Mexico. Each of the Company's business is executed in accordance with the legal requirements and relevant policies of the country of registration and the country of major operation. Moreover, the Company is well informed of policy changes and development trends and responds to changes in the market environment and takes appropriate measures in a timely manner. The Company has not had a significant impact on its financial business due to changes in important policies and laws at home and abroad.

7.6.5 Effects of and response to changes in technology and the industry relating to corporate finance and sales

The Company stays abreast of the changes in the technology and product demand of the industry, grasps the market trend, and evaluates its impact on the Company's operation. In the past year at the time of issuance of the annual report, the Company has not had a significant impact due to a major technological or industrial change.

7.6.6 The impact of changes in corporate image on corporate risk management, and the Company's response measures

Since establishment, the Company has focused on its business operations. Business results and company reputation have been excellent. In the past year at the time of issuance of the annual report, and there has not been any change in corporate image causing corporate crisis.

7.6.7 Expected benefits from, risks relating to and response to merger and acquisition plans

The Company has not had plans of mergers in the past year and up to the date of report. However, if there is a merger and acquisition plan, it will be handled according to the "Procedures for Acquisition or Disposal of Assets" of the Company. Moreover, to reduce possible risks, if the company discovers the potential merger target company in the future, it will carefully evaluate and consider the merger and the effects thereof, and consult relevant professionals. The merger decision shall be prepared and handled timely and with reasonable conditions to ensure the Company's interests and overall shareholders' rights.

7.6.8 Expected benefits from, risks relating to and response to factory expansion plans

The Company founded Esonmex Monterrey S.A. de C.V. in December 2021 in response to orders from customers in North America.(Still under construction as of publication date)

7.6.9 Risks relating to and response to excessive concentration of purchasing sources and excessive customer concentration

1. Purchasing

The Company avoids single supplier sources for each major purchase item except for suppliers with unique quality factors and customer certification. The purchase ratio of the largest supplier in 2021 and 2022 is 13.63% and 21.45% respectively. The top ten suppliers' purchase ratios were 46.02% and 52.10%, respectively. The overall purchase did not focus on a single supplier. The main raw materials required for the production of components of consumer electronic products at the Company, including metal materials, composite parts and plastic parts, are available from a wide range of suppliers. There is no concentration of purchases from a single supplier risking out-of-stock worries.

2. Sales

The Company's main sales target are international OEMs and brand manufacturers of consumer electronics products such as TV, computer, and ICT. The sales ratios of the customers of the largest sales in 2021 and 2022 are 25.73% and 36.27%, respectively. The sales ratios of the top ten customers were 85.74% and 87.58% respectively. Although there are concentrated sales of goods, due to industrial characteristics, downstream brand manufacturers are mostly concentrated on orders from international OEMs. In addition, due to the excellent technical capacities, the Company has won recognitions of international OEMs and brand manufacturers, and thus established a dominant position in the industry, and has long-term stable cooperative relations with major sales targets. The Company is also actively involved in R&D of new products, thereby reducing the risk of concentration of sales.

7.6.10 Effects of risks relating to and response to large share transfers or changes in shareholdings by directors, supervisors, or shareholders with shareholdings of over 10%

The Company has not had any of the described share transfers in the past year and up to the date of report.

7.6.11 Effects of risks relating to and response to the changes in management rights

In order to strengthen corporate governance, the Company held a full re-election of directors at the shareholders' meeting on October 31, 2012, and introduced independent directors, set up an audit committee to enhance the protection of the overall shareholders' equity. The operating performance of the Company's management team is sound and should continue to receive support from major shareholders.

7.6.12Other major risks and responses

1. International raw material prices fluctuate greatly, and wages are high, which reduces the risk of profit margins.

In recent years, the cost of international raw materials has increased. Among them, steel plates are the main raw materials for the production of metal stamping components required for TV. Due to the increase in the prices of raw materials, the cost of parts production has increased significantly. This is expected to be the case in the future; In addition, the product process of machine components is labor intensive, but provinces in the mainland have increased their wages, and it is estimated that there will still be room for improvement in the next few years. Therefore, the high cost has become a problem for all component manufacturers.

Response measures

- A. Strengthen production processes, reduce unnecessary manpower in the production process, and train employees to enhance work efficiency and reduce the impact of rising labor costs on operations.
- B. Establish solid long-term interaction with a number of upstream raw material suppliers to mitigate the impact of raw material price fluctuations and ensure the stability of supply.
- C. Strengthen inventory and liquidity management to mitigate the impact of fluctuations in raw material prices.

2. Risk of retaining customer orders

Machine component manufacturers have expanded their production capacity and actively upgraded their technology to secure new orders. Under the continuous growth in overall production capacity and competition in the industry, and the rapid changes in consumer market products, the ability to continue to obtain customer orders to maintain high utilization rate at the production line has a huge impact on the Company's operations.

Response measures

The Company is a professional manufacturer of products such as mold development, plastic molding, metal stamping and related surface treatment technology. It can flexibly adjust the appearance of

consumer products and can provide customers with one-stop purchase service. The Company operates through diverse products to divert operational risks.

In addition, the Company will increase and meet the customer's order demand with a strategy of serving customers nearby. It has the advantages of economies of scale, which raises the barrier for new market entrants. In the future, it will continue to deepen the cooperation relationship with customers to consolidate the source of orders.

3. Risk of change in technology and major raw materials

In response to lightweight and compact requirements, 3C products need to use high-strength, high-heat-dissipating materials. Based on the common materials used in current mechanical components, metallic materials are superior to plastic materials in terms of strength and heat dissipation. However, the development of plastic (polymer) composite materials, such as glass fiber and carbon fiber materials, are now on par with metallic materials in terms of strength and heat dissipation, which will impact the development of metal mechanical parts.

Response measures

The choice of material of the machine component will affect the appearance and durability of the product. Considering material cost and strength, the metallic components remain the mainstream option. The Company will follow closely the development trend and continue to assess the feasibility of new material applications and refine the existing technology to enhance competitiveness.

4. Risks related to statements made in this annual report

A. Facts and statistics

Certain information and statistics of this annual report are compiled from different statistical publications. However, external publications may be inaccurate, incomplete or not up to date. The Company makes no declaration as to the authenticity or accuracy of such statements in external publications, and investors should not place undue reliance on such information for investment judgment.

B. Forward-looking statements and risks and uncertainties contained in this annual report

Certain forward-looking statements and information about the Company and its related companies contained in this annual report. These statements and information are based on the beliefs, assumptions and current information of the management of the Company. In the current report, "predict", "believe", "can", "expect", "future", "intention", "or will", "must", "plan", "estimate", "seek", "shall", "will", "may", "likely" and similar statements, when used by the management of the Company, are forward-looking statements. Such statements reflect current views of the Company's management on future events, operations, liquidity, and sources of funding, some of which may not realize or may change. These statements are subject to certain risks, uncertainties and assumptions, including other risk factors as described in this annual report. Investors should carefully consider the known and unknown risks and uncertainties involved in relying on any forward-looking statements. The risks and uncertainties faced by the Company may affect the accuracy of the forward-looking statements, including but not limited to the following:

- Chapter 5 of this annual report, description of operations overview
- > Statements in this annual report regarding prices, volume, operations, profit trends, overall market trends, risk management and exchange rates.

The Company will not update the forward-looking statements of this annual report or make changes in response to future events or information. In the light of these risks and other risks, uncertainties and assumptions, the forward-looking statements and circumstances of this annual report may or may not occur in the manner expected by the Company or may not occur at all. Therefore, investors should not rely on any of the forward-looking statements.

For other important risks and countermeasures related to the operation of the Company, please refer to the favorable, unfavorable factors and countermeasures of the Company's development prospects on page 72 of this annual report. However, despite these countermeasures, the implementation may still be subject to force majeure and other factors that cannot be fully implemented, and the related risks may still affect the Company's business, operating results, and financial status.

5. Challenges the management team faces in becoming a listed company for the first time

The Company's management team has rich experience in the operation of the industry. However, after stock listing, the Company needs to face a large number of investors or professional investment institutions. The Company is also a foreign company and needs to adapt to the laws and regulations of Taiwan.

Response measures

Before applying for listing, the Company has successively recruited qualified talents required by the various operating locations around the world and has organized excellent team members as a strong backing for management. Moreover, some management personnel have also worked in Taiwan's well-known listed and OTC companies in Taiwan and are thus familiar with relevant local laws and regulations. Therefore, the company is prepared to meet the challenges of becoming a listed company.

The Company is a holding company that relies on the performance of its subsidiaries and their ability
to distribute dividends and is subject to restrictions on the distribution of dividends and the transfer
of funds.

The Company is a holding company established in the Cayman Islands with no commercial operations and revenue sources. The Company has no other assets and liabilities other than stock rights to the subsidiaries. Therefore, the profit source mainly relies on its operating subsidiaries. The Company's subsidiaries in China and in Singapore are the source of profit for the Group's important operations. Therefore, the issuance of cash dividends of the Company will be affected by the cash dividends of the subsidiaries or the surplus reserves.

However, the cash dividends issued by the subsidiaries will be subject to the restrictions on the local state dividends, regulations on repatriation of revenues, cash transfers and foreign exchange controls, and will be affected by exchange rate changes. The Company has no full control over these factors.

In addition, the subsidiaries of the Company are separate and independent legal entities. When a subsidiary goes bankrupt, loses its liquidity, reorganizes, liquidates, or realizes its assets, the

Company's acquired assets or distribution order will be inferior to the creditors of the subsidiary, including the trading subject of the subsidiaries and the holders of the bonds issued by the subsidiaries.

The distribution of dividends or other benefits of the Company will be handled in accordance with relevant regulations. It is recommended that investors should understand and consult with experts on the impact of taxation of their own investment holding companies.

7. Risk of protection of shareholders' rights

The Cayman Islands' company law has many different rules from the Taiwan Company Act. Although the Company has amended the Articles of Association in accordance with the "Checklist for the Protection of Shareholders' Rights and Interests of Foreign Issuer in Registration Countries" as stipulated by the Taiwan Stock Exchange Co., Ltd., there remain many differences between local laws and regulations on the operation of the Company. Investors cannot apply the legal rights used to invest in Taiwan companies to protect their investments in Cayman Islands companies. Investors shall fully understand and consult with experts on whether their shareholder's rights and interests are effectively protected in their investment in a Cayman Islands company.

8. Information security risks:

High-availability data backup systems are established in the information system framework in accordance with the risk level. We strengthen simulation tests and emergency response drills in server rooms and evaluate the operational risks and impact in terms of finance, regulations, and customers. We plan, design, and improve appropriate software/hardware equipment and resources and implement response measures to improve work procedures, reduce risks of system interruption caused by unforeseen natural disasters or human errors, and ensure that we meet the target of system recovery time.

7.6.13 Litigation or Non-litigation Matters

Suntool Co., Ltd. had a product dispute with its client, leading to the possibility of US\$300 thousand in uncollectible accounts receivable. Furthermore, the client of Suntool's client demanded an additional compensation for damage that amounted to CAD4,000, and the litigation is still going. Suntool Co., Ltd. has recognized a full impairment loss for the total amount of receivables. In addition, Suntool Co., Ltd. assessed that compensation is very unlikely to occur and thus did not assess the related losses. Suntool Co., Ltd. obtained the documentation for the approval of dissolution on October 23, 2018 which approved the dissolution on September 18, 2018 after related debt declaration and dissolution procedures were completed.

There are no concluded or pending litigious, non-litigious, or administrative litigation events in the past year up to the printing of this annual report that can have a significant impact on shareholders' equity or securities prices.

8.6 Differences between the Company's Articles of Association and ROC's Shareholders' Rights Protection Guidelines

The Company has amended the Articles of Association in accordance with the important matters of shareholders' rights protection listed in the "Checklist for Protection of Shareholders' Rights and Interests of Foreign Issuer in Registration Countries" as amended by the Stock Exchange on January 9, 2023. However, some important matters on the protection of shareholders' rights and interests are not applicable under the laws of Cayman Islands, and thus has not been amended in the Company's articles of association. Please refer to the following table for details:

Important matters of shareholder protection

Articles of Association and reason for discrepancy

Procedures and resolutions of the shareholders' meeting

- The annual general meeting shall be convened at least once a year. It should be held within six months after the end of each fiscal year. Shareholders' meetings are convened by the board of directors.
- 2. The shareholders' meeting shall be held in the territory of the Republic of China. If the shareholders' meeting is convened outside the Republic of China, the stock exchange shall approve within two days after the resolution of the board of directors or the shareholders obtain the permission from the competent authority.
- 3. Shareholders who own more than 1% of the company's outstanding shares are entitled to propose, in writing, agenda items for discussion in annual general meetings. If the proposing shareholder do not hold 1% of the shares, the proposal is not a shareholder's resolution, or there is more than one proposal, they shall not be included in the agenda.
- 4. If the Shareholder continue to hold more than one year and hold more than 3% of the total outstanding shares, they may write down the proposed matters and reasons and request the Board of Directors to convene an extraordinary shareholders meeting. Within 15 days after the request is filed, and the Board of Directors has not notified to convene the meeting, the Shareholder may report to the competent authority for permission to convene

Regarding the extraordinary shareholders' meeting convened by the shareholders, as a result of the Cayman Company Law, such acts are not subject to the permission of the local authorities of the Cayman Islands. Therefore, Article 18.5 of the Articles of Association does not specify that the competent authority should be notified in advance for permission before they convene the extraordinary shareholders' meeting. In addition, since the convening of the extraordinary shareholders' meeting is not subject to the permission of the local authorities of the Cayman Islands, if shareholders hold their own meeting outside the Republic of China, Article 18.5 of the Articles of Association of the Company only stipulates that the Stock Exchange should be notified in advance for approval, instead of "reporting to the Stock Exchange for approval within two days after the shareholders have obtained the permission from the competent authority" as required by the "Important Matters in the Protection of Shareholders' Rights and Interests".

exercising voting rights.

2. Shareholders' voting rights may be exercised

Important matters of shareholder protection

- electronically or in writing when the Company's shareholders' meeting is held outside of the Republic of China.
- 3. The shareholders' meeting notice must explain the methods through which shareholders may exercise voting rights in writing or in electronic form. Shareholders who have voted in writing or using the electronic method are considered to have attended shareholders' meeting in person. However, they are considered to have waived their rights to participate in any special motions or amendments to the original agendas that may arise during the shareholders' meeting.
- 4. Instructions to exercise written and electronic votes must be delivered to the Company at least two days before the shareholders' meeting. In the event where there are duplicate submissions, the earliest submission shall be taken into record. However, exception shall be granted if the shareholder issues a proper declaration to withdraw the previous vote.
- 5. If the shareholder decides to attend the shareholders' meeting in person after submitting a written or electronic vote, a proper declaration of withdrawal must be issued in the same method as did the original vote no later than two days before the shareholders' meeting. If the withdrawal is not received in time, then the written or electronic vote shall be taken into record.
- 6. If the shareholder has exercised written or electronic votes, and at the same time delegated a proxy to attend the shareholders meeting, then the voting decision exercised by the proxy shall prevail.

The following agenda involving major rights and interests of shareholders require the attendance of shareholders representing more Articles of Association and reason for discrepancy

rights of the chairman of the shareholders' meeting are not subject to the 3% shareholding restriction. In this regard, Article 24.4 of the Articles of Association of the Company stipulates that "the shareholder shall be deemed to be the agent of the chairman of the meeting by way of written voting or electronically exercising his voting rights according to written or electronic instructions in the shareholders' meeting in accordance with the provisions of the preceding rules," rather than "the shareholders who exercise the voting rights in writing or electronically, are deemed to be attending the shareholders' meeting in person," as stipulated in the "Important Matters in the Protection of Shareholders' Rights and Interests". Moreover, in Article 25.3 of the Articles of Association of the Company, the voting rights of the agent of the chairman of the shareholders' meeting are not subject to the 3% holding restriction of the total issued shares.

1.Regarding the resolution method of the shareholders' meeting, in addition to the ordinary and supermajority resolutions under the ROC laws, the "special resolution"

Important matters of shareholder protection

than two-thirds of the total issued shares, and more than half of the voting rights of the attending shareholders shall agree to proceed. If the total number of shares of the attending shareholders is less than the aforementioned quota, shareholders representing over half of the current outstanding shares may attend in which two thirds of the attending shareholders must agree to proceed:

- 1. Concluding, altering or terminating a contract for the lease of all business, entrusted operations or usual co-operation with others, the transfer of all or a major part of the business or property, the transfer of all business or property of others that has a significant impact on the Company's operations.
- 2. Change of charter
- 3. If the change of the Articles of Association has damaged the rights of preferred stock shareholders, resolution of the preferred stock shareholders' meeting is required.
- All or part of the dividends and bonuses are distributed by way of new shares;
- 5. Resolutions on the dissolution, merger or split of the Company.
- 6. Private placement of securities

Articles of Association and reason for discrepancy

defined by the Cayman Islands' Company Law is also included in Article 1.1 of the Articles of Association of the Company. The special resolution refers to resolutions passed by at least two-thirds of the shareholders of voting rights (vote in person or by appointed proxy) at the shareholders' meeting. The meeting notice must also legally state that the resolution will be carried out by special resolution; However, the Company's Articles of Association may specify a higher percentage and may state that various matters subject to special resolution may be passed by different percentages (but not less than two-thirds). The difference between this and the "Shareholders' Rights Protection Checklist" is that certain matters that should be resolved by supermajority in the "Shareholders' Rights Protection Checklist" are regulated by the Cayman Islands' Company Law in the Company's Articles of Association (refer to point 2 for details). As these differences are due to Cayman Islands' laws and regulations, and the Company's Articles of Association have already listed the supermajority resolutions set out in the "Shareholders' Rights Protection Checklist" in the supermajority and special resolutions in the Company's articles of association, the impact of this part on shareholders' equity should be limited.

- 2. According to the regulations of the Cayman Islands' Company Law, the following matters shall be determined by special resolutions:
 - (1)Change of charter

According to the laws of the Cayman Islands, the change of charter should be carried out by special resolution specified by the Cayman Islands' company law.

Therefore, Article 11.3 of the Articles of Association does not follow the "Shareholders' Rights Protection

Checklist" regarding resolution requirement for altering organization documents and the Articles of Association by changing special resolution to supermajority resolution as required by law of the Republic of China. In addition, in accordance with Article 12 of the Articles of Association, if the amendments or changes to the Articles of Association will damage the priority of any type of shares, the relevant amendments or changes shall be

Important matters of shareholder protection Articles of Association and reason for discrepancy subject to the special resolution of the Company's shareholders meeting under the Cayman Islands' company law. A special resolution required by the Cayman Islands' company law is required for such damaged shareholder. (2)Dissolution: According to the laws of the Cayman Islands, if a company decides to voluntarily dissolve due to the inability to pay off its debt when it expires, its dissolution shall be decided by the shareholders' meeting. However, if the company is voluntarily liquidated and dissolved for reasons other than the above, its dissolution shall be subject to the special resolution prescribed by the Cayman Islands' company law. Therefore, the resolution thresholds for the liquidation and dissolution of the Company in Articles 11.5 and 63.1 of the Articles of Association of the Company have not been changed to the supermajority resolutions under the laws of the Republic of China in accordance with the requirements of "Important Matters in the Protection of Shareholders' Rights and Interests". (3)Merger: As the Cayman Islands' company law has mandatory provisions for the voting method for the "consolidation as defined by the laws of the Cayman Islands", paragraph (b) of Article 11.4 of the Articles of Association stipulates that a "merger" (unless the mergers and/or acquisitions, defined by the Cayman Islands' company law, requires a special resolutions) requires a supermajority resolution. The above differences are due to regulations of the Cayman Islands. Although when "the company is voluntarily liquidated and dissolved due to the inability to settle its debts at expiration," the company may only apply ordinary resolutions, the result should be more favorable to shareholders. Moreover, this is only applicable for specific situations and the impact on shareholders' equity should be limited. Director's authority and responsibility The laws of the Cayman Islands does not have an equivalent 1. The Where the company has set up

supervisors, the supervisor shall be elected via

concept as the supervisor. Moreover, the Company has an

against the Director on behalf of the Company, and have the Taipei District Court of Taiwan as the court of first instance.

2. Within 30 days after the shareholder makes the request, when the supervisor does not file a lawsuit, the shareholder may institute an action on behalf of the Company and the Taiwan District Court of Taiwan may be the court of first instance.

Articles of Association and reason for discrepancy

the laws of the Cayman Islands, shareholders who hold at

least three percent of the current outstanding shares for at

least one year may: (a) In writing, request the independent

director of the Audit Committee authorized by the Board of

Directors to institute an action against the Directors on behalf

of the Company, and may have the Taipei District Court of the Republic of China as the court of first instance; Or (b) In writing, request the independent director of the Audit Committee to institute an action against the Directors on behalf of the Company, and may have the Taipei District Court of the Republic of China as the court of first instance; Within 30 days after the request is made in accordance with the aforementioned Paragraph (a) or (b), if (i) the requested Board of Directors fails to authorize the independent director of the Audit Committee or the independent director of the Audit Committee authorized by the Board of Directors has not filed a lawsuit in accordance with paragraph (a); Or (b) if the independent director of requested the Audit Committee fails to institute an action, within the limits permitted by the laws of the Cayman Islands, the shareholders may institute an action on behalf of the Company against the Directors and have the Taipei District Court of the Republic of China as the court of first instance." This differs from the "Important Matters in the Protection of Shareholders' Rights and Interests," which specifies that "Shareholders who hold more than three percent of the current outstanding shares of the company for more than one year may request, in writing, the supervisor to institute an action against the Director on behalf of the Company, and have the Taipei District Court of Taiwan as the court of first instance. Within 30 days after the shareholder makes the request, when the supervisor does not file a lawsuit, the shareholder may institute an action on behalf of the Company and the Taiwan District Court of Taiwan may be the court of first instance." In addition, local lawyers reminded the following provisions of the Cayman Islands: The Cayman Islands' company law does not have specific regulations that allow certain minority shareholders to file derivative actions against the Directors in the courts of the

Cayman Islands.

Important matters of shareholder protection	Articles of Association and reason for discrepancy
	In addition, the Company's Articles of Association is not a
	contract between the shareholders and the Directors but the
	agreement between the shareholders and the Company is that
	even if the minority shareholders are allowed to file a
	derivative action against the directors in the Articles of
	Association, lawyers of the Cayman Islands believe that the
	Directors will not be bound by the contents. However, under
	common law, all shareholders (including minority
	shareholders) have the right to file derivative actions
	(including litigation against the Directors) regardless of their
	shareholding proportion or period. Once the shareholder sues,
	the court of the Cayman Islands will have full discretion to
	decide whether the shareholder can continue the litigation.
	Furthermore, even if the Company's Articles of Association
	permits minority shareholders (or shareholders with the
	required shareholding ratio or period) to institute an action
	against the Directors on behalf of the Company, whether the
	lawsuit can continue ultimately depends on the court of the
	Cayman Islands. According to a relevant verdict of the Grand
	Court of the Cayman Islands, when the court of the Cayman
	Islands considers whether to approve the continuation of a
	derivative action, the applicable criterion is whether the court
	believes and accepts that the plaintiff's request on behalf of
	the Company is substantive on the surface and the claimed
	wrongful act is made by the controllable company, and the
	controller can prevent the Company from instituting a reverse
	action. The court of the Cayman Islands will determine on a
	case-by-case basis (although the court may refer to the
	provisions of the Company's Articles of Association, this is
	not a decisive factor).
	According to the laws of the Cayman Islands, the Board of
	Directors should decide on its behalf (instead of individual
	directors) on behalf of the Company. Therefore, the Directors
	shall, in accordance with the provisions of the Articles of
	Association, authorize any director according to resolution of
	the Board to file a lawsuit against other directors on behalf of
	the Company.
	The Cayman Islands' company act does not provide a clear
	specification to enable shareholders request the Directors to
	convene a board meeting to resolve specific matters.

Ir	mportant matters of shareholder protection	Articles of Association and reason for discrepancy
		However, the Cayman Islands' company act does not prohibit
		the Company from establishing rules relating to the board
		meeting procedures in the Articles of Association (including
		the provisions for convening the board meeting).

	shall bear the same liability for damages	orders and causes damage to others when executing the
	within the scope of their duties as the	Company's business operations, the Director, manager and
	Directors of the Company.	the Company shall be jointly liable for compensation.
		In addition, local lawyers reminded the following
		provisions of the Cayman Islands:
		The Director's liability to the Company under the laws
		of the Cayman Islands can be broadly divided into common
		law responsibilities (professional competence, observation
		and diligence) and loyalty obligations. However, the
		Directors are legally obligated under the provisions of
		various laws and, in certain circumstances, also have
		obligations to third parties (such as creditors). If the
		Company is or in the risk of unable to pay off, the Directors
		should consider the interests of the creditors when fulfilling
		their obligations.
		Since the Company's Articles of Association contains
		agreements between shareholders and the Company, the
		Directors are not parties to the Company's Articles of
		Association. Therefore, all rights to damages against the
		Directors claiming the violation of their obligations should be
		standardized in the service contract.

Important matters of shareholder protection	Articles of Association and reason for discrepancy
	Under the laws of the Cayman Islands, in general, a manager
	or supervisor does not have the same responsibility as a
	company director for a company or its shareholders.
	However, if the manager or supervisor is authorized to act on
	behalf of the senior executive, it will be subject to the same
	obligations as the company's directors. For the avoidance of
	doubt, companies of the Cayman Islands generally regulates
	its managers' or supervisors' responsibilities and obligations
	to the company and its shareholders in their service contracts.
	Similarly, since the Company's Articles of Association
	contains agreements between shareholders and the Company,
	the managers and supervisors are not parties to the
	Company's Articles of Association. Therefore, all rights to
	damages against the managers and supervisors claiming the
	violation of their obligations should be standardized in the
	service contract.
	In addition, regarding the provisions of the directors' interests
	as the company's income, the lawyers of the Cayman Islands
	believe that such regulations are uncertain and too general, so
	they have doubts about their enforceability. For example,
	whether a director's breach of obligation is left to the court to
	finalize and how the benefit is defined (and the period in
	which it benefits). The lawyers of the Cayman Islands also
	believe that this clause does not limit the director's
	responsibilities. Directors are still subject to various statutory,
	common law and fiduciary duties under the laws of the
	Cayman Islands.

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders Eson Precision Ind. Co., Ltd.

Opinion

We have audited the accompanying consolidated financial statements of Eson Precision Ind. Co., Ltd. and its subsidiaries (collectively referred to as the "Group"), which comprise the consolidated balance sheets as of December 31, 2022 and 2021, and the consolidated statements of comprehensive income, changes in equity and cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies (collectively referred to as the "consolidated financial statements").

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2022 and 2021, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and the Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with The Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matter is this matter that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the year ended December 31, 2022. This matter was addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on this matter.

The key audit matter of the Group's consolidated financial statements for the year ended December 31, 2022 is described as follows:

Recognition of Revenue from Sales of Some Automobile Mechanical Parts

The revenue of the Group is mainly derived from sales of automobile mechanical parts, television mechanical parts, molds and other mechanical parts.

The gross profit margin of some automobile mechanical parts is higher than others, and the Group's sales revenue has increased compared with that of 2021. The revenue from sales of these automobile mechanical parts accounted for a significant proportion of the consolidated operating revenue for the year ended December 31, 2022; therefore, we considered the occurrence of the recognition of revenue from sales of some automobile mechanical parts as a key audit matter of the Group's consolidated financial statements for the year ended December 31, 2022.

The audit procedures that we performed in response to the sales revenue recognition included the following: (1) We obtained an understanding of the design and determined the effectiveness of the implementation of the main internal controls of sales revenue, and (2) we selected samples of revenue items, inspected customer orders or contracts, shipping documents and payment status, etc., and confirmed that transactions had occurred.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the audit committee, are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- 1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- 5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6. Obtain sufficient and appropriate audit evidence regarding the financial information of entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision, and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements for the year ended December 31, 2022 and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audits resulting in this independent auditors' report are Ke-Chang Wu and Ming-Yu Chiu.

Deloitte & Touche Taipei, Taiwan Republic of China

March 13, 2023

Notice to Readers

The accompanying consolidated financial statements are intended only to present the consolidated financial position, financial performance and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such consolidated financial statements are those generally applied in the Republic of China.

For the convenience of readers, the independent auditors' report and the accompanying consolidated financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language independent auditors' report and consolidated financial statements shall prevail.

CASH AND CASH EQUIVALENTS AT END OF THE YEAR	<u>\$ 2,117,631</u>	\$ 1,853,404
The accompanying notes are an integral part of the consolidated financial st	atements.	(Concluded)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2022 AND 2021 (In Thousands of New Taiwan Dollars, Unless Stated Otherwise)

1. GENERAL INFORMATION

Eson Precision Ind. Co., Ltd. (the "Company"), formerly known as Multiwin Precision Ind. Co., Ltd., was incorporated in the Cayman Islands on June 17, 2008 and changed its name after resolution of the shareholders' meeting in February 2012.

The Company mainly designs, develops, manufactures and sells molds, plastics, hardware products and new types of electronic components and flat-panel displays. The Company's shares have been listed on the Taiwan Stock Exchange of the Republic of China (ROC) since November 25, 2013.

The functional currency of the Company is the U.S. dollar. For greater comparability and consistency of financial reporting, the consolidated financial statements are presented in New Taiwan dollars, since the Company's shares are listed on the Taiwan Stock Exchange.

2. APPROVAL OF FINANCIAL STATEMENTS

The consolidated financial statements of the Company and its subsidiaries (collectively referred to as the "Group") were approved by the Company's board of directors on March 13, 2023.

3. APPLICATION OF NEW, AMENDED AND REVISED STANDARDS AND INTERPRETATIONS

a. Initial application of the amendments to the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) (collectively, the "IFRSs") endorsed and issued into effect by the Financial Supervisory Commission (FSC)

The initial application of the IFRSs endorsed and issued into effect by the FSC did not have material impact on the Group's accounting policies.

b. The IFRSs endorsed by the FSC for application starting from 2023

New, Amended and Revised Standards and Interpretations	Effective Date Announced by IASB
Amendments to IAS 1 "Disclosure of Accounting Policies"	January 1, 2023 (Note 1)
Amendments to IAS 8 "Definition of Accounting Estimates"	January 1, 2023 (Note 2)
Amendments to IAS 12 "Deferred Tax related to Assets and	January 1, 2023 (Note 3)
Liabilities arising from a Single Transaction"	

- Note 1: The amendments will be applied prospectively for annual reporting periods beginning on or after January 1, 2023.
- Note 2: The amendments will be applicable to changes in accounting estimates and changes in accounting policies that occur on or after the beginning of the annual reporting period beginning on or after January 1, 2023.

Note 3: Except for deferred taxes that were recognized on January 1, 2022 for temporary differences associated with leases and decommissioning obligations, the amendments were applied prospectively to transactions that occurred on or after January 1, 2022.

1) Amendments to IAS 1 "Disclosure of Accounting Policies"

The amendments specify that the Group should refer to the definition of material to determine its material accounting policy information to be disclosed. Accounting policy information is material if it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements. The amendments also clarify that:

- Accounting policy information that relates to immaterial transactions, other events or conditions is immaterial and need not be disclosed;
- The Group may consider the accounting policy information as material because of the nature of the related transactions, other events or conditions, even if the amounts are immaterial; and
- Not all accounting policy information relating to material transactions, other events or conditions is itself material.

The amendments also illustrate that accounting policy information is likely to be considered as material to the financial statements if that information relates to material transactions, other events or conditions and:

- a) The Group changed its accounting policy during the reporting period and this change resulted in a material change to the information in the financial statements;
- b) The Group chose the accounting policy from options permitted by the standards;
- c) The accounting policy was developed in accordance with IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors" in the absence of an IFRS that specifically applies;
- d) The accounting policy relates to an area for which the Group is required to make significant judgements or assumptions in applying an accounting policy, and the Group discloses those judgements or assumptions; or
- e) The accounting is complex and users of the financial statements would otherwise not understand those material transactions, other events or conditions.

2) Amendments to IAS 8 "Definition of Accounting Estimates"

The amendments define that accounting estimates are monetary amounts in financial statements that are subject to measurement uncertainty. In applying accounting policies, the Group may be required to measure items at monetary amounts that cannot be observed directly and must instead be estimated. In such a case, the Group uses measurement techniques and inputs to develop accounting estimates to achieve the objective. The effects on an accounting estimate of a change in a measurement technique or a change in an input are changes in accounting estimates unless they result from the correction of prior period errors.

Except for the above impact, as of the date the consolidated financial statements were authorized for issue, the Group has assessed that the application of other standards and interpretations will not have a material impact on the Group's financial position and financial performance.

c. The IFRSs in issue but not yet endorsed and issued into effect by the FSC

New, Amended and Revised Standards and Interpretations	Effective Date Announced by IASB (Note 1)
Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets between an Investor and its Associate or Joint Venture"	To be determined by IASB
Amendments to IFRS 16 "Leases Liability in a Sale and Leaseback"	January 1, 2024 (Note 2)
IFRS 17 "Insurance Contracts"	January 1, 2023
Amendments to IFRS 17	January 1, 2023
Amendments to IFRS 17 "Initial Application of IFRS 9 and IFRS 17 -	January 1, 2023
Comparative Information"	•
Amendments to IAS 1 "Non-current Liabilities with Covenants"	January 1, 2024
Amendments to IAS 1 "Classification of Liabilities as Current or	January 1, 2024
Non-current"	-

- Note 1: Unless stated otherwise, the above IFRSs are effective for annual reporting periods beginning on or after their respective effective dates.
- Note 2: A seller-lessee shall apply the Amendments to IFRS 16 retrospectively to sale and leaseback transactions entered into after the date of initial application of IFRS 16.

Amendments to IAS 1 "Classification of Liabilities as Current or Non-current" (referred to as the "2020 amendments") and "Non-current Liabilities with Covenants" (referred to as the "2022 amendments")

The 2020 amendments clarify that for a liability to be classified as non-current, the Group shall assess whether it has the right at the end of the reporting period to defer settlement of the liability for at least twelve months after the reporting period. If such rights are in existence at the end of the reporting period, the liability is classified as non-current regardless of whether the Group will exercise that right.

The 2020 amendments also stipulate that, if the right to defer settlement is subject to compliance with specified conditions, the Group must comply with those conditions at the end of the reporting period even if the lender does not test compliance until a later date. The 2022 amendments further clarify that only covenants with which an entity is required to comply on or before the reporting date should affect the classification of a liability as current or non-current. Although the covenants to be complied with within twelve months after the reporting period do not affect the classification of a liability, the Group shall disclose information that enables users of financial statements to understand the risk of the Group that may have difficulty complying with the covenants and repay its liabilities within twelve months after the reporting period.

The 2020 amendments stipulate that, for the purpose of liability classification, the aforementioned settlement refers to a transfer of cash, other economic resources or the Group's own equity instruments to the counterparty that results in the extinguishment of the liability. However, if the terms of a liability that could, at the option of the counterparty, result in its settlement by a transfer of the Group's own equity instruments, and if such option is recognized separately as equity in accordance with IAS 32 "Financial Instruments: Presentation", the aforementioned terms would not affect the classification of the liability.

Except for the above impact, as of the date the consolidated financial statements were authorized for issue, the Group is continuously assessing the possible impact of the application of other standards and interpretations on the Group's financial position and financial performance and will disclose the relevant impact when the assessment is completed.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Statement of compliance

The consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, related regulations and IFRSs as endorsed and issued into effect by the FSC.

b. Basis of preparation

The consolidated financial statements have been prepared on the historical cost basis except for financial instruments which are measured at fair value.

The fair value measurements, which are grouped into Levels 1 to 3 based on the degree to which the fair value measurement inputs are observable and the significance of the inputs to the fair value measurement in its entirety, are described as follows:

- 1) Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities;
- 2) Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- 3) Level 3 inputs are unobservable inputs for the asset or liability.
- c. Classification of current and non-current assets and liabilities

Current assets include:

- 1) Assets held primarily for the purpose of trading;
- 2) Assets expected to be realized within 12 months after the reporting period; and
- 3) Cash and cash equivalents unless the asset is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period.

Current liabilities include:

- 1) Liabilities held primarily for the purpose of trading;
- 2) Liabilities due to be settled within 12 months after the reporting period; and
- 3) Liabilities for which the Group does not have an unconditional right to defer settlement for at least 12 months after the reporting period.

Assets and liabilities that are not classified as current are classified as non-current.

d. Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and the entities controlled by the Company (i.e., its subsidiaries).

Income and expenses of subsidiaries acquired or disposed of during the period are included in the consolidated statement of comprehensive income from the effective date of acquisition and up to the effective date of disposal, as appropriate.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by the Group.

All intra-group transactions, balances, income and expenses are eliminated in full upon consolidation. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Changes in the Group's ownership interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the interests of the Group and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the owners of the Company.

Details of subsidiaries, including the percentages of ownership, and main businesses and products are detailed as follows:

		Establishment				-
Name of Investor	Name of Investee	and Operating Location	Functional Currency	Decemb 2022	2021	Main Businesses and Products

Note a: The liquidation procedures were completed on June 30, 2021.

Note b: In the second quarter of 2022, Eson Singapore participated in the capital increase in cash.

Note c: In the first quarter of 2022, Esonmex Monterrey S.A. DE C.V. was established in Mexico.

e. Foreign currencies

In preparing the financial statements of each individual entity in the Group, transactions in currencies other than the entity's functional currency (i.e., foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions.

At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Exchange differences on monetary items arising from settlement or translation are recognized in profit or loss in the period in which they arise.

Non-monetary items measured at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Exchange differences arising from the retranslation of non-monetary items are included in profit or loss for the period except for exchange differences arising from the retranslation of non-monetary items in respect of which gains and losses are recognized directly in other comprehensive income; in which cases, the exchange differences are also recognized directly in other comprehensive income.

Non-monetary item denominated in a foreign currency and measured at historical cost is stated at the reporting currency as originally translated from the foreign currency.

For the purpose of presenting the consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into U.S. dollars using exchange rates prevailing at the end of each reporting period. Income and expense items are translated at the average exchange rates for the period, and exchange differences arising are recognized in other comprehensive income (attributed to the owners of the Company and non-controlling interests as appropriate). The exchange differences accumulated in equity, which resulted from the translation of the functional currency into the presentation currency, are not subsequently reclassified to profit or loss.

On the disposal of a foreign operation (i.e., disposal of the Company's entire interest in a foreign operation, or disposal involving the loss of control over a subsidiary that includes a foreign operation, or partial disposal of an interest in a joint arrangement or an associate that includes a foreign operation of which the retained interest becomes a financial asset), all of the exchange differences accumulated in equity in respect of that operation attributable to the owners of the Company are reclassified to profit or loss.

When translating into the New Taiwan dollar, assets and liabilities are translated into New Taiwan dollars using exchange rates prevailing at the balance sheet date. Income and expense items are translated using the average exchange rates for the period. The resulting currency translation differences are recognized in other comprehensive income (attributed to the owners of the Company and non-controlling interests as appropriate). The exchange differences accumulated in equity, which resulted from the translation of the functional currency into the presentation currency, are not subsequently reclassified to profit or loss.

f. Inventories

Inventories consist of raw materials, supplies, finished goods and work in progress and are stated at the lower of cost or net realizable value. Inventory write-downs are made by item, except where it may be appropriate to group similar or related items. The net realizable value is the estimated selling price of inventories less all estimated costs of completion and costs necessary to make the sale. Inventories are recorded at the weighted-average cost on the balance sheet date.

g. Property, plant and equipment

Property, plant and equipment are initially measured at cost and subsequently measured at cost less accumulated depreciation and accumulated impairment loss.

Property, plant and equipment in the course of construction are measured at cost less any recognized impairment loss. Cost includes professional fees and borrowing costs eligible for capitalization. Products produced when testing whether an item of property, plant and equipment is functioning properly before that asset reaches its intended use are measured at the lower of cost or net realizable value, and any proceeds from selling those products and the cost of those products are recognized in profit or loss. Such assets are depreciated and classified into the appropriate categories of property, plant and equipment when completed and ready for their intended use.

Except for freehold land which is not depreciated, the depreciation of property, plant and equipment is recognized using the straight-line method. Each significant part is depreciated separately. The estimated useful lives, residual values and depreciation methods are reviewed at the end of each reporting period, with the effects of any changes in the estimates accounted for on a prospective basis.

On derecognition of an item of property, plant and equipment, the difference between the sales proceeds and the carrying amount of the asset is recognized in profit or loss.

h. Investment properties

Investment properties are properties held to earn rental and/or for capital appreciation. Investment properties include right-of-use assets and properties under construction that meet the definition of investment properties. Investment properties also include land held for a currently undetermined future use.

Investment properties are initially measured at cost, including transaction costs. Subsequent to initial recognition, investment properties are measured at cost less accumulated depreciation and accumulated impairment loss.

Investment properties acquired through leases are initially measured at cost, which comprises the initial measurement of lease liabilities adjusted for lease payments made on or before the commencement date, plus initial direct costs incurred and an estimate of costs needed to restore the underlying assets, less any lease incentives received. These investment properties are subsequently measured at cost less accumulated depreciation and accumulated impairment loss and adjusted for any remeasurement of the lease liabilities.

Depreciation is recognized using the straight-line method.

For a transfer of classification from property, plant and equipment and right-of-use assets to investment properties, the deemed cost of an item of property for subsequent accounting is its carrying amount at the end of owner-occupation.

On derecognition of an investment property, the difference between the net disposal proceeds and the carrying amount of the asset is included in profit or loss.

i. Intangible assets

1) Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are initially measured at cost and subsequently measured at cost less accumulated amortization and accumulated impairment loss. Amortization is recognized on a straight-line basis over their estimated useful lives. The estimated useful lives, residual values, and amortization methods are reviewed at the end of each reporting period, with the effect of any changes in the estimates accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are measured at cost less accumulated impairment loss.

2) Derecognition of intangible assets

On derecognition of an intangible asset, the difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss.

j. Impairment of property, plant and equipment, right-of-use asset and intangible assets

At the end of each reporting period, the Group reviews the carrying amounts of its property, plant and equipment, right-of-use asset and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Corporate assets are allocated to the individual cash-generating units on a reasonable and consistent basis of allocation.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually and whenever there is an indication that the asset may be impaired.

The recoverable amount is the higher of fair value less costs to sell and value in use. If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount, with the resulting impairment loss recognized in profit or loss.

When an impairment loss is subsequently reversed, the carrying amount of the corresponding asset or cash-generating unit is increased to the revised estimate of its recoverable amount, but only to the extent of the carrying amount that would have been determined had no impairment loss been recognized on the asset or cash-generating unit in prior years. A reversal of an impairment loss is recognized in profit or loss.

k. Financial instruments

Financial assets and financial liabilities are recognized when the Group becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issuance of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

1) Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

a) Measurement categories

Financial assets are classified into the following categories: Financial assets at amortized cost and investments in equity instruments at FVTOCI.

i. Financial assets at amortized cost

Financial assets that meet the following conditions are subsequently measured at amortized cost:

- i) The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- ii) The contractual terms of the financial assets give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Subsequent to initial recognition, financial assets at amortized cost (including cash and cash equivalents and trade receivables at amortized cost) are measured at amortized cost, which equals the gross carrying amount determined using the effective interest method less any impairment loss. Exchange differences are recognized in profit or loss.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for:

- i) Purchased or originated credit-impaired financial asset, for which interest income is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the financial asset; and
- ii) Financial assets that are not credit impaired on purchase or origination but have subsequently become credit impaired, for which interest income is calculated by applying the effective interest rate to the amortized cost of such financial assets in subsequent reporting periods.

A financial asset is credit impaired when one or more of the following events have occurred:

- i) Significant financial difficulty of the issuer or the borrower;
- ii) Breach of contract, such as a default;
- iii) It is becoming probable that the borrower will enter bankruptcy or undergo a financial reorganization; or
- iv) The disappearance of an active market for that financial asset because of financial difficulties.

Cash equivalents include time deposits with original maturities within 3 months from the date of acquisition, which are highly liquid, readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. These cash equivalents are held for the purpose of meeting short-term cash commitments.

ii. Investments in equity instruments at FVTOCI

On initial recognition, the Group may make an irrevocable election to designate investments in equity instruments as at FVTOCI. Designation as at FVTOCI is not permitted if the equity investment is held for trading or if it is contingent consideration recognized by an acquirer in a business combination.

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognized in other comprehensive income and accumulated in other equity. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments; instead, it will be transferred to retained earnings.

Dividends on these investments in equity instruments are recognized in profit or loss when the Group's right to receive the dividends is established unless the dividends clearly represent a recovery of part of the cost of the investment.

b) Impairment of financial assets

The Group recognizes a loss allowance for expected credit losses on financial assets at amortized cost (including trade receivables).

The Group always recognizes lifetime expected credit losses (ECLs) for trade receivables. For all other financial instruments, the Group recognizes lifetime ECLs when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on a financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month ECLs.

Expected credit losses reflect the weighted average of credit losses with the respective risks of default occurring as the weights. Lifetime ECLs represent the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECLs represent the portion of lifetime ECLs that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

For internal credit risk management purposes, the Group considers that the following situations indicate that a financial asset is in default (without taking into account any collateral held by the Group):

- i. Internal or external information shows that the debtor is unlikely to pay its creditors.
- ii. Financial asset is more than 90 days past due unless the Group has reasonable and corroborative information to support a more lagged default criterion.

The impairment loss of all financial assets is recognized in profit or loss by a reduction in their carrying amounts through a loss allowance account.

c) Derecognition of financial assets

The Group derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

On derecognition of a financial asset at amortized cost in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss.

2) Financial liabilities

a) Subsequent measurement

All financial liabilities are measured at amortized cost using the effective interest method.

b) Derecognition of financial liabilities

The difference between the carrying amount of a financial liability derecognized and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

1. Provisions

Provisions are measured at the best estimate of the discounted cash flows of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

m. Revenue recognition

The Group identifies the performance obligations in the contract with customers, allocates the transaction price to the performance obligations and recognized revenue when performance obligation are satisfied.

Revenue from the sale of goods

Revenue from the sale of goods comes from sales of plastic products, hardware products and molds etc., which are classified by product type into automobile mechanical parts, TV mechanical parts, server mechanical parts and molds and others. Sales of goods are recognized as revenue when the goods are delivered to the customer's specific location or the goods are shipped because it is the time when the customer has full discretion over the manner of distribution and price to sell the goods, has the primary responsibility for sales to future customers and bears the risks of obsolescence. Trade receivables are recognized concurrently.

The Group does not recognize revenue on materials delivered to subcontractors because this delivery does not involve a transfer of control.

n. Leasing

At the inception of a contract, the Group assesses whether the contract is, or contains, a lease.

1) The Group as lessor

Leases are classified as finance leases whenever the terms of a lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

When the Group subleases a right-of-use asset, the sublease is classified by reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset.

Lease payments (less any lease incentives payable) from operating leases are recognized as income on a straight-line basis over the terms of the relevant leases. Initial direct costs incurred in obtaining operating leases are added to the carrying amounts of the underlying assets and recognized as expenses on a straight-line basis over the lease terms.

2) The Group as lessee

The Group recognizes right-of-use assets and lease liabilities for all leases at the commencement date of a lease, except for short-term leases and low-value asset leases accounted for applying a recognition exemption where lease payments are recognized as expenses on a straight-line basis over the lease terms.

Right-of-use assets are initially measured at cost, which comprises the initial measurement of lease liabilities adjusted for lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs needed to restore the underlying assets, and less any lease incentives received. Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses and adjusted for any remeasurement of the lease liabilities. Right-of-use assets are presented on a separate line in the consolidated balance sheets.

Right-of-use assets are depreciated using the straight-line method from the commencement dates to the earlier of the end of the useful lives of the right-of-use assets or the end of the lease terms. However, if leases transfer ownership of the underlying assets to the Group by the end of the lease terms or if the costs of right-of-use assets reflect that the Group will exercise a purchase option, the Group depreciates the right-of-use assets from the commencement dates to the end of the useful lives of the underlying assets.

Lease liabilities are initially measured at the present value of the lease payments, which comprise fixed payments. The lease payments are discounted using the interest rate implicit in a lease if that rate can be readily determined. If that rate cannot be readily determined, the lessee's incremental borrowing rate will be used.

Subsequently, lease liabilities are measured at amortized cost using the effective interest method, with interest expense recognized over the lease terms. When there is a change in a lease term, a change in the amounts expected to be payable under a residual value guarantee, the Group remeasures the lease liabilities with a corresponding adjustment to the right-of-use-assets. However, if the carrying amount of the right-of-use assets is reduced to zero, any remaining amount of the remeasurement is recognized in profit or loss. For lease modifications that are not treated as separate leases, the remeasurement of the lease liability due to the reduction in the scope of the lease is to reduce the right-of-use asset, and to recognize the profit and loss of the partial or full termination of the lease; the re-measurement of the lease liability due to other modifications is to adjust the right-of-use asset. Lease liabilities are presented on a separate line in the consolidated balance sheets.

The Group negotiates with the lessor for rent concessions as a direct consequence of Covid-19 to change the lease payments originally due by June 30, 2022, which results in the revised consideration for the lease less than the consideration for the lease immediately preceding the change. There is no substantive change to other terms and conditions. The Group elects to apply the practical expedient to all of these rent concessions and, therefore, does not assess whether the rent concessions are lease modifications. Instead, the Group recognizes the reduction in lease payment in profit or loss as a deduction of depreciation of right-of-use assets, in the period in which the events or conditions that trigger the concession occur, and makes a corresponding adjustment to the lease liability.

Variable lease payments that do not depend on an index or a rate are recognized as expenses in the periods in which they are incurred.

o. Employee benefits

1) Short-term employee benefits

Liabilities recognized in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related services.

2) Retirement benefits

Payments to defined contribution retirement benefit plans are recognized as expenses when employees have rendered services entitling them to the contributions.

p. Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

1) Current tax

Income tax payable (recoverable) is based on taxable profit (loss) for the year determined according to the applicable tax laws of each tax jurisdiction.

Adjustments of prior years' tax liabilities are added to or deducted from the current year's tax provision.

2) Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities and the corresponding tax bases used in the computation of taxable profit.

Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences, unused loss carryforwards and unused tax credits for purchases of machinery, equipment and technology to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the assets to be recovered. A previously unrecognized deferred tax asset is also reviewed at the end of each reporting period and recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liabilities are settled or the assets are realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

3) Current and deferred taxes for the year

Current and deferred taxes are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity; in which case, the current and deferred taxes are also recognized in other comprehensive income or directly in equity, respectively.

5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, management is required to make judgments, estimations and assumptions on the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered relevant. Actual results may differ from these estimates.

The Group considers the possible impact of the recent development of COVID-19 and its economic environment implications when making its critical accounting estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised if the revisions affect only that period or in the period of the revisions and future periods if the revisions affect both current and future periods.

Key Sources of Estimation Uncertainty

a. Estimated impairment of financial assets

The provision for impairment of trade receivables is based on assumptions on probability of default and loss given default. The Group uses judgment in making these assumptions and in selecting the inputs to the impairment calculation, based on the Group's historical experience, existing market conditions as well as forward-looking estimates as of the end of each reporting period. Where the actual future cash inflows are less than expected, a material impairment loss may arise. Furthermore, the estimate of the probability of default is subject to greater uncertainties due to the impact on credit risk of financial assets arising from the uncertain impact and volatility in financial markets caused by the COVID-19 pandemic.

b. Write-down of inventories

The net realizable value of inventories is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale. The estimation of net realizable value is based on current market conditions and historical experience with product sales of a similar nature. Changes in market conditions may have a material impact on the estimation of the net realizable value.

6. CASH AND CASH EQUIVALENTS

	December 31			
	2022		2021	
Cash on hand	\$	459	\$	912
Deposits in banks	1,9	909,438	1,7	770,028
Time deposits with original maturities of less than 3 months		207,734		82,464
	<u>\$ 2,</u>	117,631	\$ 1,8	853,404

The market rate intervals of deposits in banks at the end of the reporting period were as follows:

	Decen	December 31		
	2022	2021		
ks	0.01%-1.80%	0.0001%-1.80%		

Some of the Group's bank deposits are reserve accounts for short-term borrowings and guarantee deposits for customs and electricity, which are reclassified to "financial assets at amortized cost" (refer to Notes 14 and 25 for the details). The amounts are as follows:

	December 31		
	2022	2021	
Current Non-current	\$ 10,541 	\$ 9,970 5,360	
	<u>\$ 15,987</u>	<u>\$ 15,330</u>	

7. FINANCIAL ASSETS AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME

Investments in Equity Instruments at FVTOCI

	December 31	
	2022	2021
Non-current		
Foreign investments Foreign unlisted (counter) shares Ordinary shares - Jiangsu Ankoglass Optical Material Co., Ltd.	<u>\$ 4,876</u>	<u>\$ 4,799</u>

The investments in equity instruments of Jiangsu Ankoglass Optical Material Co., Ltd. are held for medium- to long-term strategic purposes. Accordingly, the management elected to designate these investments in equity instruments as at FVTOCI as they believe that recognizing short-term fluctuations in the investments' fair value in profit or loss would not be consistent with the Group's strategy of holding the investments for long-term purposes.

8. FINANCIAL ASSETS AT AMORTIZED COST

	December 31	
	2022	2021
Current		
Foreign investments Time deposits with original maturities of more than 3 months (a) Less: Allowance for impairment loss	\$ 180,304 	\$ 203,110 - \$ 203,110
Non-current		
Foreign investments Time deposits with original maturities of more than 1 year (b) Less: Allowance for impairment loss	\$ 5,446 	\$ 5,360

a. The ranges of interest rates for time deposits with original maturities of more than 3 months were approximately 2.10% and 2.10%-3.15% per annum as of December 31, 2022 and 2021, respectively.

b. The ranges of interest rates for time deposits with original maturities of more than 1 year were 2.75% as of December 31, 2022 and 2021.

9. NOTES RECEIVABLE AND TRADE RECEIVABLES

	December 31	
	2022	2021
Notes receivable		
At amortized cost Notes receivable-operating Less: Allowance for impairment loss	\$ 21,997	\$ - -
	<u>\$ 21,997</u>	<u>\$ -</u>
<u>Trade receivables</u>		
At amortized cost Gross carrying amount Less: Allowance for impairment loss	\$ 2,589,312 (32,756)	\$ 1,894,179 (17,728)
	<u>\$ 2,556,556</u>	<u>\$ 1,876,451</u>
<u>Trade receivables from related parties</u>		
At amortized cost Gross carrying amount (Note 24) Less: Allowance for impairment loss	\$ 444,480 	\$ 563,657
	<u>\$ 444,480</u>	<u>\$ 563,657</u>

The average credit period of sales of goods is 60-150 days. The Group adopted a policy of only dealing with entities that are rated the equivalent of investment grade or higher and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. Credit rating information is supplied by independent rating agencies where available and, if not available, the Group uses other publicly available financial information and its own trading records to rate its major customers. The Group's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved annually.

In order to minimize credit risk, the management of the Group has delegated a team responsible for determining credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual trade debt at the end of the reporting period to ensure that adequate allowance is made for possible irrecoverable amounts. In this regard, the management believes the Group's credit risk was significantly reduced.

The Group applies the simplified approach to providing for expected credit losses prescribed by IFRS 9, which permits the use of lifetime expected loss provision for all trade receivables. The expected credit losses on accounts receivable are estimated using an overdue aging ratio and individual customer evaluation method, adjusted for general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecasted direction of economic conditions at the reporting date. As the Group's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished according to the Group's different customer base.

The Group writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery. For trade receivables that have been written off, the Group continues to engage in enforcement activity to attempt to recover the receivables due. Where recoveries are made, these are recognized in profit or loss.

The following table details the loss allowance of trade receivable based on the overdue aging ratio and individual customer evaluation method.

Overdue

Overdue

December 31, 2022

	Not Overdue	1-90 Days	91-180 Days	Over 180 Days	Total
Expected credit loss rate	0%	0%-50%	100%	100%	
Gross carrying amount Loss allowance (Lifetime ECL) Loss allowance (individual	\$ 2,674,387	\$ 349,916 (1,404)	\$ 31,292 (25,804)	\$ 194 (194)	\$ 3,055,789 (27,402)
customer ECL)	- _	(4,128)	(1,226)	_	(5,354)

b. Lease liabilities

	December 31	
	2022	2021
Carrying amount		
Current Non-current	\$ 9,551 \$ 16,110	\$ 17,128 \$ 3,188

Range of discount rate for lease liabilities was as follows:

	December 31	
	2022	2021
Land	-	-
Buildings	0.79%-4.35%	0.79%-6.80%

c. Material leasing activities and terms

Because of the market conditions severely affected by COVID-19 in 2022, the Group negotiated with the lessor for rent concessions for plant lease. The lessor agreed to provide unconditional 50% rent reduction from January 1 to June 30, 2022. The Group recognized in profit or loss the impact of rent concessions of \$2,707 thousand presented in operating costs for the year ended December 31, 2022.

d. Other lease information

	For the Year Ended December 31	
	2022	2021
Expenses relating to short-term leases	\$ 19,791	\$ 20,497
Expenses relating to low-value asset leases	<u>\$ 13,873</u>	<u>\$ 10,085</u>
Expenses relating to variable lease payments not included in the measurement of lease liabilities	\$ 29,852	\$ 19,820
Total cash outflow for leases	\$ (79,614)	\$ (61,724)

13. INVESTMENT PROPERTIES

	Buildings	Land in Right-of-use Assets	Total
Cost			
Balance at January 1, 2022 Transfers from assets used by the Group Transfers from right-of-use assets Effects of foreign currency exchange differences	\$ - 433,239 - (2,473)	\$ - - 48,478 (277)	\$ - 433,239 48,478 (2,750)

Accumulated depreciation and impairment			
Balance at January 1, 2022 Transfers from assets used by the Group Transfers from right-of-use assets Depreciation expenses Effects of foreign currency exchange differences	\$ - 266,202 - 16,243 (1,613)	\$ - 13,730 632 (82)	\$ - 266,202 13,730 16,875 (1,695)
Balance at December 31, 2022	<u>\$ 280,832</u>	<u>\$ 14,280</u>	<u>\$ 295,112</u>
Carrying amounts at December 31, 2022	<u>\$ 149,934</u>	\$ 33,921	<u>\$ 183,855</u>

Wuxi Singuan and Dongguan Yihong of the Group lease out buildings and right-to-use assets under operating leases for 10 years and 6 years, respectively. The lease contracts contain market review clauses in the event that the lessees exercise their options to extend. The lessees do not have bargain purchase options to acquire the assets at the expiry of the lease periods.

In addition to the fixed lease payments, the lease contracts also indicate that the lease payments should be adjusted every 2 to 3 years with an increase of 3%-6%.

The maturity analysis of lease payments receivable under operating leases of investment properties was as follows:

	December 31, 2022
Year 1	\$ 62,584
Year 2	91,537
Year 3	93,170
Year 4	96,004
Year 5	96,179
Year 6 onwards	350,482
	<u>\$ 789,956</u>

To reduce the residual asset risk related to assets at the end of the relevant lease, the Group follows its general risk management strategy.

Investment properties are depreciated using the straight-line method over their estimated useful lives as follows:

Buildings
Land in Right-of-use assets

20 years
50 years

The determination of fair value was measured by the Company's management using Level 3 inputs. The fair value as appraised was \$502,203 thousand.

14. BORROWINGS

b.

a. Short-term borrowings

	December 31			
	2022		2021	
Unsecured Borrowings	Rate	Amount	Rate	Amount
Line of credit borrowings	4.89%-5.38%	\$ 706,330	0.74%-1.08%	\$ 954,960
Long-term borrowings				

	Purpose	Decem	ber 31
		2022	2021
Taipei Fubon Bank	Credit borrowings, period 2022.05.31 to 2025.05.30. The principal shall be the first installment two years before the due date of the loan period, and thereafter every 6 months shall be divided into 5 installments, repayment of 12.5% in each of the first four installments, and the remaining balance is due for settlement.	\$ 377,119	\$ -
Taishin International Bank	Credit borrowings, period 2022.08.11 to 2025. 08.11. The principal shall be the first installment two years before the due date of the loan period, and thereafter every 3 months shall be divided into 9 installments, repayment of 10% in each of the first eight installments, and the remaining balance is due for settlement.	399,138	-
Less: Current portion of long-term borrowings		<u>(174,107</u>)	
		\$ 602,150	\$ -

The interest rate range of the above long-term borrowings was 4.33%- 6.40% for the year ended December 31, 2022.

The Group should maintain certain financial ratios in its annual and semiannual audited consolidated financial statements during the loan period. The Group's consolidated financial statements for the year ended December 31, 2022 showed that the Group was in compliance with the agreed financial ratio requirements.

For details on assets pledged as collateral, refer to Notes 6 and 25.

15. OTHER LIABILITIES

	December 31	
	2022	2021
<u>Current</u>		
Other payables		
Payables for salaries or bonuses	\$ 354,978	\$ 280,562
Other payables to related parties (Note 24)	8,175	7,245

directors	95,245	59,337
Payables for other expenses	235,594	211,479
	\$ 743,713	\$ 591,336

16. RETIREMENT BENEFIT PLANS

Subsidiaries of the Group in mainland China adopted the pension plan under the act of mainland China, which is a state-managed defined contribution plan. Under the act, an entity makes contributions to pension funds at a specific rate of salaries and wages. Subsidiaries in Singapore, Europe, Malaysia, Vietnam and Mexico adopted the pension plan under the local act, which is a state-managed defined contribution plan. Eson Precision Ind. Co., Ltd. Taiwan Branch adopted a pension plan under the Labor Pension Act (LPA) of the Republic of China, which is a state-managed defined contribution plan. Under the LPA, an entity makes monthly contributions to employees' individual pension accounts at 6% of monthly salaries and wages.

17. EQUITY

a. Share capital

Ordinary shares

	December 31	
	2022	2021
Number of shares issued and fully paid (in thousands) Shares issued	168,529 \$ 1,685,289	168,529 \$ 1,685,289

Every ordinary share issued with a par value of NT\$10 carries one vote per share and a right to dividends.

As of December 31, 2022 and 2021, the share capital was both NT\$1,685,289 thousand, divided into 168,529 thousand ordinary shares with a par value of NT\$10.

b. Capital surplus

	December 31	
	2022	2021
Issuance of ordinary shares	\$ 2,349,249	<u>\$ 2,349,249</u>

The capital surplus generated from the excess of the issuance price over the par value of share capital (including the shares issued for new capital, mergers and convertible bonds) may be used to offset a deficit; in addition, when the Company has no deficit, such capital surplus may be distributed as cash dividends or transferred to share capital (limited to a certain percentage of the Company's capital surplus and to once a year).

c. Retained earnings and dividends policy

1) Under the dividends policy as set forth in the Company's Articles, where the Company made a profit in a fiscal year, the profit shall be first utilized for paying taxes, offsetting losses of previous years, setting aside as a legal reserve of 10% of the remaining profit, setting aside or reversing a special reserve in accordance with the laws and regulations, and then any remaining profit together with any undistributed retained earnings shall be used by the Company's board of directors as the basis for proposing a distribution plan, which should be resolved in the shareholders' meeting for the distribution of dividends and bonuses to shareholders. For the policies on the distribution of compensation of employees and remuneration of directors after the amendment, refer to compensation of employees and remuneration of directors and supervisors in Note 18-c.

Besides, according to the Company's Articles, cash dividends distributed should not be less than 50% of the total dividends distributed. The actual distribution ratio is subject to the resolution of the shareholders in the shareholders' meeting.

An appropriation of earnings to a legal reserve shall be made until the legal reserve equals the Company's paid-in capital. The legal reserve may be used to offset deficits. If the Company has no deficit and the legal reserve has exceeded 25% of the Company's paid-in capital, the excess may be transferred to capital or distributed in cash.

2) The appropriations of earnings for 2021 and 2020, which were approved in the shareholders' meetings on June 24, 2022 and July 7, 2021, respectively, were as follows:

	<u>Appropriatio</u>	n of Earnings	Dividends Pe	r Share (NT\$)
		For the Year Ended December 31		ear Ended iber 31
	2021	2020	2021	2020
Legal reserve	\$ 46,378	\$ 46,097	\$ -	\$ -
Special reserve	125,994	97,579	-	-
Cash dividends	235,940	286,499	1.40	1.70

The appropriation of earnings for 2022 had been proposed by the Company's board of directors on March 13, 2023. The appropriation and dividends per share were as follows:

	Appropriation of Earnings	Dividends Per Share (NT\$)
Legal reserve	\$ 80,092	\$ -
Cash dividends	269,646	1.60

The appropriation of earnings for 2022 are subject to the resolution of the shareholders in the shareholders' meeting to be held on June 20, 2023.

d. Special reserve

	For the Year Ended December 31	
	2022	2021
Balance at January 1 Appropriations in respect of	\$ 700,585	\$ 603,006
Debit balance of other equity items	125,994	97,579
Balance at December 31	<u>\$ 826,579</u>	\$ 700,585

Upon initial application of IFRS, the amount transferred from accumulated exchange differences to retained earnings was \$158,921 thousand, and the same amount was appropriated to the special reserve.

e. Other equity items

1) Exchange differences on translation of the financial statements of foreign operations

	For the Year Ended December 31	
	2022	2021
Balance at January 1 Recognized for the year	\$ (820,962)	\$ (700,585)
Exchange differences on translation of the financial statements of foreign operations	(361,657)	57,520
Exchange differences on translation to the presentation currency	700,016	(177,897)
Balance at December 31	<u>\$ (482,603)</u>	<u>\$ (820,962</u>)

2) Unrealized loss on financial assets at FVTOCI

	For the Year Ended December 31	
	2022	2021
Balance at January 1 Unrealized loss on investments in equity instruments at	\$ (5,617)	\$ -
FVTOCI	-	(5,617)
Balance at December 31	<u>\$ (5,617)</u>	<u>\$ (5,617)</u>

f. Non-controlling interests

	For the Year Ended December 31	
	2022	2021
Balance at January 1 Partial disposal of subsidiaries	\$ - 	\$ 5,101 (5,101)
Balance at December 31	<u>\$</u>	<u>\$ -</u>

18. NET PROFIT FROM CONTINUING OPERATIONS

a. Depreciation and amortization

	For the Year Ended December 31	
	2022	2021
Property, plant and equipment Right-of-use assets Investment properties Intangible assets and long-term prepayments for leases	\$ 508,526 20,714 16,875 10,970	\$ 415,801 17,439 13,673
	<u>\$ 557,085</u>	<u>\$ 446,913</u>
An analysis of depreciation by function Operating costs Operating expenses	\$ 492,323 <u>53,792</u> \$ 546,115	\$ 385,037 48,203 \$ 433,240
An analysis of amortization by function Operating costs Operating expenses	\$ 2,028 8,942 \$ 10,970	\$ 2,242 11,431 \$ 13,673

b. Employee benefits expense

	For the Year Ended December 31	
	2022	2021
Defined contribution plans Other employee benefits	\$ 80,362 	\$ 72,482 2,108,020
Total employee benefits expense	<u>\$ 2,182,250</u>	<u>\$ 2,180,502</u>
An analysis of employee benefits expense by function Operating costs Operating expenses	\$ 1,258,325 923,925	\$ 1,496,360 684,142
	<u>\$ 2,182,250</u>	\$ 2,180,502

c. Compensation of employees and remuneration of directors

In accordance with the Articles of the Company, the compensation of employees and remuneration of directors should be distributed at rates of 2% to 8% and no more than 0.5%, respectively, of net profit before income tax, compensation of employees and remuneration of directors.

The compensation of employees and remuneration of directors of 2022 and 2021 which were approved by the Company's board of directors on March 13, 2023 and March 18, 2022, respectively, were as follows:

Accrual rate

	For the Year Ended December 31	
	2022	2021
Compensation of employees	4.0%	4.0%
Remuneration of directors	0.5%	0.5%

Amount

	For the Year Ended December 31	
	2022	2021
Compensation of employees in cash Remuneration of directors	\$ 45,868 5,734	\$ 25,161 3,145

If there is a change in the proposed amounts after the annual consolidated financial statements are authorized for issue, the differences are recorded as a change in accounting estimate.

There was no difference between the actual amounts of compensation of employees and remuneration of directors paid and the amounts recognized in the consolidated financial statements for the years ended December 31, 2021 and 2020.

Information on the compensation of employees and remuneration of directors resolved by the Company's board of directors is available on the Market Observation Post System website of the Taiwan Stock Exchange.

19. INCOME TAXES RELATING TO CONTINUING OPERATIONS

a. Major components of tax expense recognized in profit or loss

	For the Year Ended December 31	
	2022	2021
Current tax		
In respect of the current year	\$ 255,432	\$ 163,229
Adjustments for prior years	6,727	(20,896)
	262,159	142,333
Deferred income tax		
In respect of the current year	(242)	1,741
Income tax expense recognized in profit or loss	<u>\$ 261,917</u>	<u>\$ 144,074</u>

Reconciliation of accounting profit and income tax expense is as follows:

	For the Year Ended December 31	
	2022	2021
Profit before tax from continuing operations	\$ 1,062,832	<u>\$ 607,855</u>
Income tax expense calculated at the statutory rate Adjustment to expense in determining taxable income The origination and reversal of temporary differences Deferred tax effect of earnings of subsidiaries Adjustments for prior years' tax	\$ 251,971 (5,778) (242) 9,239 6,727	\$ 143,507 19,722 1,741 (20,896)
Income tax expense recognized in profit or loss	\$ 261,917	\$ 144,074

The applicable tax rate used by subsidiaries of the Group in China was 25%. (Kunshan Eson Precision Engineering Co., Ltd gets a preferential tax rate of 15% for acquiring a high-tech enterprise from 2020 to 2022.) The applicable tax rate used by subsidiaries of the Group in Mexico was 30%, and the applicable tax rate used by subsidiaries of the Group in Singapore was 17%.

b. Current tax assets and liabilities

	December 31		
	2022	2021	
Current tax assets Prepayments for taxes (recorded as other non-current assets)	<u>\$ 1,950</u>	<u>\$ 16,832</u>	
Current tax liabilities Income tax payable	<u>\$ 306,941</u>	<u>\$ 212,570</u>	

c. Deferred tax assets and liabilities

The movements of deferred tax liabilities were as follows:

<u>2022</u>

Deferred Tax Liabilities	Opening Balance	Recognized in Profit or Loss	Exchange Differences	Closing Balance
Temporary differences				
Unappropriated earnings of subsidiaries	\$ 99,270	\$ -	\$ 10,819	\$ 110,089
Unrealized foreign exchange	φ 22,270	Ψ	Ψ 10,019	Ψ 110,000
gains	511	(242)	-	269
Others	323		59	382
	<u>\$ 100,104</u>	<u>\$ (242)</u>	<u>\$ 10,878</u>	<u>\$ 110,740</u>

<u>2021</u>

Deferred Tax Liabilities	Opening Balance	Recognized in Profit or Loss	Exchange Differences	Closing Balance
Temporary differences Unappropriated earnings of	¢ 100 400	ф. 1 co1	ф. (2.000)	Ф 00 270
subsidiaries Unrealized foreign exchange	\$ 100,489	\$ 1,681	\$ (2,900)	\$ 99,270
gains	451	60	-	511
Others	306	_	17	323
	<u>\$ 101,246</u>	<u>\$ 1,741</u>	<u>\$ (2,883)</u>	<u>\$ 100,104</u>

d. Information about unused loss carryforwards for which no deferred tax assets have been recognized in the consolidated balance sheets:

	December 31		
	2022	2021	
Loss carryforwards			
Expiry in 2023	\$ 94,850	\$ 94,850	
Expiry in 2024	97,658	115,130	
Expiry in 2025	36,293	36,293	
Expiry in 2026	11,907	_	
	<u>\$ 240,708</u>	\$ 246,273	

e. Income tax assessments

The income tax returns of the Company's branch, Eson Precision Ind. Co., Ltd. Taiwan Branch, have been examined and approved by the tax authorities for the years through 2020.

20. EARNINGS PER SHARE

Unit: NT\$ Per Share

	For the Year Ended December 31	
	2022	2021
Net profit for the year (in thousands)		
Net profit used in the computation of basic earnings per share	<u>\$ 800,915</u>	<u>\$ 463,781</u>
Number of shares (in thousands)		
Weighted average number of ordinary shares used in the computation of basic earnings per share	168,529	168,529
Effects of potentially dilutive ordinary shares Compensation of employees	889	451
Weighted average number of ordinary shares used in the computation of diluted earnings per share	<u>169,418</u>	<u>168,980</u> (Continued)

	For the Year Ended December 3		
	2022	2021	
Earnings per share (in dollars)			
Basic earnings per share Diluted earnings per share	\$ 4.75 \$ 4.73	\$ 2.75 \$ 2.74 (Concluded)	

The Group may settle compensation paid to employees in cash or shares; therefore, the Group assumes that the entire amount of the compensation will be settled in shares, and the resulting potential shares are included in the weighted average number of shares outstanding used in the computation of diluted earnings per share, as the effect is dilutive. Such dilutive effect of the potential shares is included in the computation of diluted earnings per share until the number of shares to be distributed to employees is resolved in the following year.

21. NON-CASH TRANSACTIONS

For the years ended December 31, 2022 and 2021, the Group entered into the following non-cash investing and financing activities:

	For the Year Ended December 31		
	2022	2021	
Investing and financing activities that have no effect on the cash			
flows			
Cumulative translation adjustments	\$ 338,359	<u>\$ (120,377)</u>	
Acquisition of property, plant and equipment by cash Increase in property, plant and equipment during the year Add: Payables for equipment on January 1 Less: Payables for equipment on December 31	\$ 1,108,580 32,713 (49,721)	\$ 1,098,741 14,243 (32,713)	
Acquisition of property, plant and equipment by cash	<u>\$ 1,091,572</u>	<u>\$ 1,080,271</u>	

22. CAPITAL MANAGEMENT

The Group manages its capital to ensure it has sufficient necessary financial resources and operational plan to meet the needs of operating funds, capital expenditures, debt repayments and dividend distribution within the next 12 months.

23. FINANCIAL INSTRUMENTS

a. Fair value of financial instruments that are not measured at fair value

The carrying amounts of financial assets and financial liabilities not measured at fair value in the consolidated financial statements approximate their fair values.

b. Fair value of financial instruments measured at fair value on a recurring basis

1) Fair value hierarchy

December 31, 2022

	Level 1	Level 2	Level 3	Total
Financial assets at fair value through other comprehensive Foreign unlisted shares	<u>\$</u>	<u>\$</u>	<u>\$ 4,876</u>	<u>\$ 4,876</u>
<u>December 31, 2021</u>				
	Level 1	Level 2	Level 3	Total
Financial assets at fair value through other comprehensive Foreign unlisted shares	<u>\$</u>	<u>\$</u>	<u>\$ 4,799</u>	<u>\$ 4,799</u>

2) Valuation techniques and inputs applied for Level 3 fair value measurement

The fair values of unlisted equity securities were determined using the asset-based approach. The significant unobservable inputs are the liquidity discount of multiplier of price-book ratio and value of net assets. An increase in price-book ratio would result in an increase in the fair value. An increase in liquidity discount would result in a decrease in the fair value.

c. Categories of financial instruments

	December 31		
	2022	2021	
Financial assets			
Financial assets at amortized cost			
Cash and cash equivalents	\$ 2,117,631	\$ 1,853,404	
Financial assets at amortized cost - current	180,304	203,110	
Notes receivable	21,997	-	
Accounts receivable	2,556,556	1,876,451	
Accounts receivable due from related parties	444,480	563,657	
Other receivables	35,804	36,223	
Financial assets at amortized cost - non-current	5,446	5,360	
Refundable deposits	19,775	21,644	
Financial assets at FVTOCI	4,876	4,799	
Financial liabilities			
Financial liabilities at amortized cost			
Short-term borrowings	706,330	954,960	
Accounts payable	2,305,758	2,235,179	
Accounts payable to related parties	17,013	10,460	
Other payables	743,713	591,336	
Current portion of long-term borrowings	602,150	-	
Long-term borrowings	174,107	-	
Guarantee deposits	36,456	-	

d. Financial risk management objectives and policies

The Group's major financial instruments include cash and cash equivalents, financial assets at amortized cost - current, notes receivable, and trade receivable, etc.

The Group did not trade financial instruments, including derivative financial instruments, for speculative purposes.

1) Market risk

The Group's operating activities exposed it primarily to the financial risks of changes in foreign currency exchange rates and interest rates.

a) Foreign currency risk

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities, including monetary items which are offset and valued in non-functional currency on the consolidated financial statements.

Sensitivity analysis

The Group was mainly exposed to fluctuations of the RMB and U.S. dollar currency pair.

The following table details the Company's sensitivity to a 1% increase and decrease in the RMB against the U.S. dollar. The sensitivity analysis included borrowings within the Group and the borrowings are not evaluated at the functional currencies of creditors and debtors. A negative number below indicates an increase in pre-tax profit associated with the RMB strengthening 1% against the U.S. dollar. For a 1% weakening of RMB against the U.S. dollar, there would be an equal and opposite impact on pre-tax profit and the balances below would be negative.

	Impact of C	impact of U.S. Donars		
	For the Year End	led December 31		
	2022	2021		
Profit or loss*	\$ 21,706	\$ 20,100		

^{*} This was mainly attributable to the exposure outstanding on U.S. dollar - denominated accounts receivable, other receivables, accounts payable and other payables which were not hedged at the end of the reporting period.

b) Interest rate risk

Interest rate risk refers to the risk of changes in the fair values of financial instruments arising from the changes in market rates. The Group's interest rate risk arises primarily from floating rate borrowings.

Short-term and long-term borrowings which the Company entered into are at floating rates. The carrying amounts of the Group's financial liabilities with exposure to interest rates at the end of the reporting period were as follows:

	Decem	December 31		
	2022	2021		
Cash flow interest rate risk				
Financial liabilities	\$ 1,482,587	\$ 954,960		

The sensitivity analysis below was determined based on the fluctuations in fair value of the Group's variable-rate borrowings at the end of the reporting period. If interest rates had been higher/lower by one percentage, the Group's cash flows for the years ended December 31, 2022 and 2021 would have decreased/increased by \$14,826 thousand and \$9,550 thousand, respectively.

2) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in a financial loss to the Group. At the end of the reporting period, the Group's maximum exposure to credit risk, which would cause a financial loss to the Group due to the failure of the counterparty to discharge its obligation and due to the financial guarantees provided by the Group, could be equal to the carrying amount of the financial assets as stated in the balance sheets.

The Group adopted a policy of only dealing with creditworthy counterparties that are rated the equivalent of investment grade and above. The Group uses other publicly available financial information and its own trading records to rate its major customers. The Group's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties, and credit exposure is controlled by counterparty limits that are reviewed and approved regularly.

The Group transacts with a large number of customers spread across diverse industries and geographical locations. The Group continuously monitors and assesses the financial conditions of customers with accounts receivable due.

Apart from Company C, the largest customer, the Group did not have significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The receivables from Company C amounted to \$1,074,643 thousand and \$500,323 thousand as of December 31, 2022 and 2021, respectively.

3) Liquidity risk

The Group manages liquidity risk by monitoring and maintaining a level of cash and cash equivalents deemed adequate to finance the Group's operations and mitigate the effects of fluctuations in cash flows. In addition, management monitors the utilization of bank borrowings and ensures compliance with loan covenants.

a) Liquidity and interest rate risk table

The following table details the Group's remaining contractual maturities for its non-derivative financial liabilities with agreed repayment periods. The table has been drawn up based on the undiscounted cash flows of financial liabilities from the earliest date on which the Group can be required to pay. The table includes both interest and principal cash flows.

Specifically, bank loans with a repayment on demand clause were included in the earliest time band regardless of the probability of the banks choosing to exercise their rights. The maturity dates for other non-derivative financial liabilities were based on the agreed repayment dates.

To the extent that interest flows are at floating rates, the undiscounted amount was derived from the interest rate curve at the end of the reporting period.

December 31, 2022

	Weighted- Average Effective Rate (%)	On Demand or Less than 1 Month	1-3 Months	Over 3 Months to 1 Year	Over 1 year
Non-derivative financial liabilities					
Variable interest rate instruments Lease liabilities	5.12% 3.93%	\$ 261,035 <u>781</u>	\$ 445,295 1,571	\$ 174,107 	\$ 602,150 16,110
		<u>\$ 261,816</u>	<u>\$ 446,866</u>	<u>\$ 181,306</u>	<u>\$ 618,260</u>

Additional information about the maturity analysis for lease liabilities

	Less than 1 Year	1-5 Years
Lease liabilities Variable interest rate instruments	\$ 10,473 <u>887,011</u>	\$ 16,801 683,582
	<u>\$ 897,484</u>	\$ 700,383

December 31, 2021

	Weighted- Average Effective Rate (%)	On Demand or Less than 1 Month	1-3 Months	Over 3 Months to 1 Year	Over 1 year
Non-derivative financial liabilities					
Variable interest rate instruments Lease liabilities	0.89 3.60	\$ 318,320 	\$ 636,640 3,550	\$ - 11,812	\$ - 3,188
		<u>\$ 320,086</u>	<u>\$ 640,190</u>	<u>\$ 11,812</u>	\$ 3,188

Additional information about the maturity analysis for lease liabilities

	Less than 1 Year	1-5 Years
Lease liabilities Variable interest rate instruments	\$ 17,508 <u>956,953</u>	\$ 3,210
	<u>\$ 974,461</u>	\$ 3,210

The amounts included above for variable interest rate instruments for both non-derivative financial assets and liabilities are subject to change if changes in variable interest rates differ from those estimates of interest rates determined at the end of the reporting period.

b) Financing limit

	December 31	
	2022	2021
Bank credit limit		
Amount used	\$ 1,482,587	\$ 954,960
Amount unused	2,873,471	1,819,240
	<u>\$ 4,356,058</u>	\$ 2,774,200

24. TRANSACTIONS WITH RELATED PARTIES

Transactions, balances, revenue and expenses between the Company and its subsidiaries, which are related parties of the Company, have been eliminated upon consolidation and are not disclosed in this note. Details of transactions between the Group and other related parties are disclosed below.

a. The names and the relationships of related parties

Name of Related Party	Relationship with the Company
Tsai Chia Hsiang Hon Hai Precision Industry Co., Ltd. and its subsidiaries (Hon Hai and its subsidiaries) Foxconn Technology Co., Ltd. (Foxconn and its subsidiaries)	The chairman of company Investor company and its subsidiaries that account for the Company using the equity method Related party (since July 2021 to October 2021)

b. Operating transactions

	For the Year Ended December 31		
Sales of Goods	2022	2021	
Hon Hai and its subsidiaries Foxconn and its subsidiaries	\$ 2,319,278	\$ 2,545,831 	
	<u>\$ 2,319,278</u>	<u>\$ 2,547,727</u>	

Price and terms were determined in accordance with mutual agreements.

	For the Year Ended December 31	
Purchase of Goods	2022	2021
Hon Hai and its subsidiaries Foxconn and its subsidiaries	\$ 59,548 	\$ 53,435 <u>18</u>
	<u>\$ 59,548</u>	<u>\$ 53,453</u>

Price and terms were determined in accordance with mutual agreements.

Balances of receivables from related parties at the end of the reporting period are as follows:

	December 31	
Accounts Receivable	2022	2021
Hon Hai and its subsidiaries	<u>\$ 444,480</u>	\$ 563,657

For the years ended December 31, 2022 and 2021, no impairment loss was recognized for receivables from related parties.

Balances of payables to related parties at the end of the reporting period are as follows:

	December 31	
Other Receivables	2022	2021
Hon Hai and its subsidiaries	<u>\$ 22,401</u>	<u>\$ -</u>
	Decem	iber 31
Accounts Payable	2022	2021
Hon Hai and its subsidiaries	<u>\$ 17,013</u>	<u>\$ 10,460</u>
	December 31	
Other Payables	2022	2021
Hon Hai and its subsidiaries	\$ 8,175	\$ 7,245

The balances of outstanding payables to related parties are unsecured and will be paid by cash. No guarantees are held on receivables from related parties.

Other payables mainly refer to collection and payment, rent and human resource expense, etc.

c. Lease arrangements

	December 31	
Name of Related Party	2022	2021
Payments for right-of-use assets Tsai Chia Hsiang	<u>\$</u>	<u>\$ 5,872</u>

d. Remuneration of key management personnel

	For the Year Ended December 31	
	2022	2021
Short-term employee benefits Post-employment benefits	\$ 11,450 <u>227</u>	\$ 16,188 256
	<u>\$ 11,677</u>	<u>\$ 16,444</u>

The remuneration of directors and other key executives was determined by the remuneration committee based on the performance of individuals and market trends.

25. ASSETS PLEDGED AS COLLATERAL OR FOR SECURITY

The following assets were provided as collateral for the tariffs of import/export, as guarantee deposits for electricity and short-term borrowings:

	December 31	
	2022	2021
Pledge deposits (classified as financial assets at amortized cost)	<u>\$ 15,987</u>	<u>\$ 15,330</u>

26. SIGNIFICANT CONTINGENT LIABILITIES AND UNRECOGNIZED COMMITMENTS

In addition to those disclosed in other notes, significant commitments and contingencies of the Group as of December 31, 2022 were as follows:

a. Unrecognized commitments of the Group are as follows:

	Decem	ber 31
	2022	2021
Acquisition of property, plant and equipment	\$ 602,186	\$ 348,007

b. Suntool Co., Ltd. had a product dispute with its client, leading to the possibility of US\$300 thousand in uncollectible accounts receivable. Furthermore, the client of Suntool's client demanded an additional compensation for damage that amounted to CAD4,000 thousand, and the litigation is still going. Suntool Co., Ltd. has recognized a full impairment loss for the total amount of receivables. In addition, Suntool Co., Ltd. assessed that compensation is very unlikely to occur and thus did not assess the related losses. Suntool Co., Ltd. obtained the documentation for the approval of dissolution on October 23, 2018 which approved the dissolution on September 18, 2018 after related debt declaration and dissolution procedures were completed.

27. SIGNIFICANT LOSSES FROM DISASTERS

No such situation had taken place.

28. OTHER ITEMS

The operations of the Group had not been significantly affected by the COVID-19 pandemic in 2022 and 2021.

29. SIGNIFICANT EVENTS AFTER THE REPORTING PERIOD

No such situation had taken place.

30. SEPARATELY DISCLOSED ITEMS

- a. Information about significant transactions and investees:
 - 1) Financing provided to others (Table 1)
 - 2) Endorsements/guarantees provided (None)

- 3) Marketable securities held (excluding investments in subsidiaries, associates and joint ventures) (Table 2)
- 4) Marketable securities acquired or disposed of at costs or prices of at least NT\$300 million or 20% of the paid-in capital (None)
- 5) Acquisition of individual real estate at costs of at least NT\$300 million or 20% of the paid-in capital (Table 3)
- 6) Disposal of individual real estate at prices of at least NT\$300 million or 20% of the paid-in capital (None)
- 7) Total purchases from or sales to related parties amounting to at least NT\$100 million or 20% of the paid-in capital (Table 4)
- 8) Receivables from related parties amounting to at least NT\$100 million or 20% of the paid-in capital (Table 5)
- 9) Trading in derivative instruments (None)
- 10) Others: Intercompany relationships and significant intercompany transactions (Table 6)
- 11) Information on investees (Table 7)
- b. Information on investments in mainland China
 - 1) Information on any investee company in mainland China, showing the name, principal business activities, paid-in capital, method of investment, inward and outward remittance of funds, ownership percentage, net income of investees, investment income or loss, carrying amount of the investment at the end of the period, repatriations of investment income, and limit on the amount of investment in the mainland China area (Table 8)
 - 2) Any of the following significant transactions with investee companies in mainland China, either directly or indirectly through a third party, and their prices, payment terms, and unrealized gains or losses: (Not applicable)
 - a) The amount and percentage of purchases and the balance and percentage of the related payables at the end of the period
 - b) The amount and percentage of sales and the balance and percentage of the related receivables at the end of the period
 - c) The amount of property transactions and the amount of the resultant gains or losses
 - d) The balance of negotiable instrument endorsements or guarantees or pledges of collateral at the end of the period and the purposes
 - e) The highest balance, the end of period balance, the interest rate range, and total current period interest with respect to financing of funds
 - f) Other transactions that have a material effect on the profit or loss for the period or on the financial position, such as the rendering or receipt of services

c. Information of major shareholders: List all shareholders with ownership of 5% or greater showing the name of the shareholder, the number of shares owned, and percentage of ownership of each shareholder (Table 9)

31. SIGNIFICANT ASSETS AND LIABILITIES DENOMINATED IN FOREIGN CURRENCIES

The significant assets and liabilities denominated in foreign currencies were as follows:

			Decen	iber 31			
		2022				2021	
	oreign urrency	Exchange Rate	New Taiwan Dollars		oreign urrency	Exchange Rate	New Taiwan Dollars
Financial assets							
Monetary items USD	\$ 73,527	6.96 (USD:RMB)	\$ 2,258,014	\$	77,489	6.38 (USD:RMB)	\$ 2,144,896
Financial liabilities							
Monetary items USD	2,848	6.96 (USD:RMB)	87,462		4,873	6.38 (USD:RMB)	134,885

32. SEGMENT INFORMATION

The chief operating decision maker considers the design, development, manufacture and sales segments of products such as mold, plastic, and hardware goods as individual operating segments. However, these individual operating segments will be aggregated into a single operating segment when preparing the consolidated financial statements as operating profit or loss is measured and is the basis of performance assessment, and the basis of measurement is the same as the basis used in preparing the consolidated financial statements. For revenue and operating results of related segments, refer to the consolidated statements of comprehensive income.

a. Revenue from major products and services

The following is an analysis of the Group's revenue from continuing operations from its major products and services.

	For the Year En	ded December 31
	2022	2021
Automobile mechanical parts	\$ 6,230,656	\$ 4,033,012
TV mechanical parts	3,715,667	5,092,982
Server mechanical parts	3,301,905	2,139,873
Molds and others	<u>783,308</u>	776,578
	<u>\$ 14,031,536</u>	\$ 12,042,445

b. Geographical information

The Group operates in two principal geographical areas - China, Asia and the Americas.

The Group's revenue from continuing operations from external customers by location of operations and information about its non-current assets by location of assets are detailed below.

		Revenue fro Custo				Non-curr	ent A	ssets
China The Americas and Asia Others	For	the Year En	ded I	December 31		31		
		2022		2021		2022		2021
The Americas and Asia	\$	2,740,444 9,002,432 2,288,660	\$	3,251,527 6,149,655 2,641,263	\$	998,020 2,747,119 897,817	\$	1,145,802 1,740,218 760,946
	\$	14,031,536	\$	12,042,445	\$	4,642,956	\$	3,646,966

Non-current assets exclude financial assets.

c. Information about major customers

Single customers contributing 10% or more to the Group's revenue on the statements of comprehensive income for the years ended 2022 and 2021 were as follows:

	For the Year En	ded December 31
	2022	2021
Customer C	\$ 5,304,55 <u>5</u>	\$ 3,205,814
Customer A	\$ 2,319,278	\$ 2,545,831
Customer B	(Note)	\$ 2,024,072
Customer D	\$ 2,193,873	\$ 1,939,428

Note: The amount of revenue did not reach 10% of the Group's total revenue.

- 2. Limit on investments in mainland China: Not applicable.
 - Note 1: Investment methods are classified into the following three categories:
 - a. Directly invest in a company in mainland China.
 - b. Indirect investment in an investee in mainland China through investment in a holding company registered in a third area (the holding company registered in the third area is specified).
 - c. Other methods.
 - Note 2: The investment gain (loss) recognized is based on the audited financial statements of the investee company.
 - Note 3: It refers to the amount invested by the holding companies registered in a third area.

INFORMATION OF MAJOR SHAREHOLDERS DECEMBER 31, 2022

	Shares			
Name of Major Shareholder	Number of Shares	Percentage of Ownership (%)		
Golden Harvest Management Limited Ace Progress Holdings Limited Investment Account under the Custody of Taishin Bank Ltd.	44,613,345 15,351,375 9,365,000	26.47 9.11 5.55		

- Note 1: The information of major shareholders presented in this table is provided by the Taiwan Depository & Clearing Corporation based on the number of ordinary shares and preference shares held by shareholders with ownership of 5% or greater, that have been issued without physical registration (including treasury shares) by the Company as of the last business day for the current quarter. The share capital in the consolidated financial statements may differ from the actual number of shares that have been issued without physical registration because of different preparation basis.
- Note 2: If a shareholder delivers the shareholdings to the trust, the above information will be disclosed by the individual truster who opened the trust account. For shareholders who declare insider shareholdings with ownership greater than 10% in accordance with the Security and Exchange Act, the shareholdings include shares held by shareholders and those delivered to the trust over which shareholders have rights to determine the use of trust property. For information relating to insider shareholding declaration, please refer to Market Observation Post System.
